

Green Garter Brings Donnery & Rudd

African safari? Donnery and Rudd? Yes, the word is out-It's the Green Garter coffee house. The first coffee house of the year will be held from October 16th to 19. The theme will be an African safari with authentic African atmosphere and food! Featured will be a folk rock group called Donnery and Rudd.

Donnery and Rudd consist of a girl and boy who say they influenced by such performers as Dionne Warwick, Ion Tyson, and Pat Paulson-who they plan to vote for in November! They are young, talented, hip, very entertaining, and will also appear on "On Campus" the following week. Asked the question of who they would most like to share a hospital room with, one replied,

"George Martin who is Producer-arranger of the Beatles. I would groove better however, if we could skip the hospital!"

Other attraction of the coffee house includes the dance of the Tinkling a dance done with bamboo poles. Also a drawing will be held Saturday night for African carvings authentically made by "Wick" Wickline. Anyone from the Friday or Saturday night audience will be eligible to win. The M.C. for the Green Garter will be the entertaining and celebrated Ronnie Caldwell of our own local Talent.

The performances will begin at 7:00 on Wednesday and Thursday nights and 7:30 on Friday and Saturday nights with an afternoon performance at 12:30 on Thursday. Admission will be \$

1.50 drag \$ 1.00 stag and 25c in the afternoon. As a special feature this year the Green Garter is offering free admission to the companion of a U. N. C.-C. faculty member who comes Thursday evening.

Richard Dedmon, Program Chairman, stated that after the last Green Garter success, there is a lot to live up to; hence, they have created a coffee house that will be entertaining for all and that "our hope is to have a coffee house that will never be seen at another school." Richard had this to say about those who have been in connection with this year's Green Garter- "I am very pleased with the enthusiasm of the people working with me in helping to create a really unique Green Garter."

Around the Nation

HOUSTON, Texas -(I.P.) — The campus architect responsible for planning and construction of the University of California's new major center at Irvine has been named to administer a burgeoning expansion of physical plant at the University of Houston.

Coulson Tough, 41, has been appointed vice president, facilities planning and construction, at UH. President Philip G. Hoffman said that the University has been interviewing candidates from over the nation in the search for a man to whom he could delegate the complexities of planning and building an estimated \$75,000,000 in new facilities at

the University by 1972.

Tough is a graduate of the University of Michigan College of Architecture and Design, which he entered after World War II service. He was employed in architectural offices until 1955, when he was named project architect at the University of California at Los Angeles (UCLA).

Seven years later, he was invited to the new University of California (Irvine) campus as senior architect responsible for initial long-range planning and building construction. He was subsequently named campus architect and director of planning and development.

President Hoffman praised Tough's training, experience, and "demonstrated record of high competence."

ALBUQUERQUE, N.M. -(I.P.) — Working with faculty, after a year and a half of planning, student government representatives at the University of New Mexico have drafted a satisfactory faculty evaluation program.

The new project was given a scientific emphasis with the help of Prof. Ralph Norman of the psychology department, and administrative consultation through Dr. Harold Lavender, vice-president for student affairs.

There are several purposes for the evaluation. It is hoped that a bank of information will be formed which can be used as one factor in determining faculty tenure, salary, and promotion. Another idea behind the plan is to provide feedback for the professor which will help him in improving teaching methods.

Louis Leurig, director of the Data Processing Center, estimates the cost of the program at between \$6500 and \$7700 a year for his department. This figure could rise or fall as new problems arise or more workable methods are devised. All information obtained will go into a file cabinet at the center.

Classroom procedures are featured in the plan. Techniques, pace, goals, and student participation are some factors to be judged.

There will be a meeting of the Blackfriars in room C-206 Wednesday, October 9 at 11:30. Tryouts for the fall play will be held on Wednesday, October 9 and Thursday, October 10, from 2 until 4 in room C-206.

"Sed haec prius fuere" —Catullus

Emotions to Play With?

By Barbara Jean Smith

The influence of an organized group on an unorganized mass is not only appalling, but frightening. This influence is exemplified by a political rally. Thousands upon thousands of individuals are gathered separately, individually, and unorganized-like puppets with limp strings, awaiting a puppeteer to gather them and make them move.

The first step of the organized group to draw their "puppets" together, is to work with the individual by moving him with songs, shouts, and signs. Once the individuals are singing and shouting together, they slowly begin to adhere. Seeing one person laugh and sing, eventually persuades the watcher to do so himself-to join in and belong. Upon the thousands of individuals have become one moving mass-interacting by common motions.

Emotions are easily played upon. It's so easy to forget reason when emotion is so natural. Soon reason is forgotten and emotions prevail-leaving the mind easily accessible. The words of the central figure do not penetrate the ringing of his songs and the shouting of his name-hence; regardless of his words, he has become the center of the mass—the Puppeteer.

On Campus

Fraternities, and eventually sororities, will play more and more of an important part on this campus as the University grows and expands its horizons.

"On Campus" presents a definitive look at fraternities on this campus with through the eyes of four fraternity men: Earl Quom of Alpha Kappa Psi, Ron Oster of Alpha Phi Omega, Wayne Eason of Delta Sigma Phi, and Dickie McGordon of Pi Kappa

Beta Iota Mu, the UNC-C Biology Club, is sponsoring a coffee hour with free refreshments October 9 at 11:30 in K-107. The faculty of the Biology Department will take part in an informal panel discussion concerning areas of curriculum; the opportunities with an undergraduate degree; what the Biology Department offers a student who plans to go to graduate school, medical school, or dental school; and what you can do with a graduate degree. Everyone is invited.

Social Fraternities

The Subcommittee of the Student Activities Committee held three open meetings last week for the discussion of fraternities and sororities on campus. Each meeting had about ten students attending. The sub-committee chaired by Mr. Boykin wanted a sample of student opinion on fraternities and sororities. The findings of the sub-committee will be reported to the Student Activities Committee. It will in turn make a report to the faculty with either recommending or disapproving fraternities or sororities. The faculty will like wise make its recommendation to the chancellor who has the final say-so about the organizations.

The S.A. C. will also consider the answers from questionnaires sent out to other institutions before making a final decision. The questionnaires were sent to the Deans of Students at other

colleges asking for their opinions on the fraternities and sororities which they had, or why they did not have these organizations on campus. It will probably be several months before a final decision is reached by Chancellor Colvard. specific duties should be mentioned.

When a test or battery of test has been chosen by a professionally trained person, the tests should be validated. The company must be able to demonstrate that the tests do not discriminate unfairly.

Federal requirements for eliminating cultural bias in testing pose no threat to apparel companies—wherever they are located. Tests that take cultural background differences into account are to manufacturer's advantage, since they make more accurate evaluations of abilities and aptitudes possible.

The Amber House

A good University like UNC-C deserves good food, and that's what we serve from six in the morning 'til 11:30 at night.

5625 North Tryon Street

Attention: College Students

MEN and WOMEN to work afternoon and evening, three days a week. Salary -- \$250 per month.

For information pertaining to job, contact Mr. King
