# Received Allotment

By MARTHA MOORE

Library

State College has allotted Charlotte College \$800 for engineering books this year. This is an increase of \$300 over the gift our library received from State in 1959.

The C.C. library staff is presently compiling a list of additional books needed.

Hypocrisy is folly. It is much easier, safer and pleasanter to be the thing which a man aims to appear, than to keep up the appearance of what he is not.-Cecil.

#### EXCERPTS FROM THE REPUBLICAN PARTY PLATFORM Reprinted From NEA Journal

We commend the objective of the Republican administration in sponsoring the National Defense Education Act to stimulate improvement of study and teaching in selected fields at the local level

Toward the goal of fullest possible educational opportunity for every American, we pledge these actions:

Federal support of the primary and secondary schools by a program of federal aid for school construction - pacing it to the real needs of individual school districts in states and territories, and requiring state approval and participation.

Stimulation of actions designed to update and strengthen vocational education for both youth and adults.

Support of efforts to make adequate library facilities available to

all our citizens. Continued support of programs to strengthen basic research in education; to discover the best methods for helping handicapped, retarded, and gifted children to realize their highest potential.

The federal government can also play a part in stimulating higher education. Constructive action would include:

The federal program to assist in construction of college housing. Extension of the federal student-loan program and graduatefellowship program.

Consideration of means through tax laws to help offset tuition

Continued support of the East-West Center for Cultural and Technical Interchange in Hawaii.

Federal matching grants to help states finance the cost of state surveys and inventories . .

Provision should be made for . . . the creation of a permanent, top-level commission to advise the president and the secretary of Health, Education, and Welfare .

There is a temporary shortage of classrooms for our elementary and secondary schools in a limited number of states. But this shortage, due to the vigilant action of state legislatures and local

school boards, is not increasing, but is decreasing. We believe, moreover, that any large plan of federal aid to education, such as direct contributions to or grants for teachers' salaries, can only lead ultimately to federal domination and control of our schools, to which we are unalterably opposed.

### EXCERPTS FROM THE DEMOCRATIC PARTY PLATFORM Reprinted From NEA Journal

"The right to a good education." — America's young people are our greatest resources for the future. Each of them deserves the education which will best develop his potentialities.

We shall act at once to help in building the classrooms and employing the teachers that are essential if the right to a good education is to have genuine meaning for all the youth of America in the decade

As a national investment in our future we propose a program of loans and scholarship grants to assure that qualified young Americans will have full opportunity for higher education, at the institutions of their choice, regardless of the income of their parents.

The new Democratic administration will end eight years of official neglect of our educational system.

America's education faces a financial crisis . . .

Only the federal government is not doing its part. For eight years, measures for the relief of the educational crisis have been held up by the cynical maneuvers of the Republican Party in Congress and the White House

We believe that America can meet its educational obligations only with generous federal financial support, within the traditional framework of local control. The assistance will take the form of federal grants to states for educational purposes they deem most pressing, including classroom construction of academic facilities as The Charlotte College Chorus well as dormitories at colleges and universities.

We pledge further federal support for all phases of vocational after its regular meeting Friday education for youth and adults; for libraries and adult education; night, October 21. Light refresh- for realizing the potential of educational television; and for exchange ments were served to approximate- of students and teachers with other nations.

As part of a broader concern for young people, we recommend and Larry Irvin served on the re- establishment of a Youth Conservation Corps, to give underprivileged young people a rewarding experience in a healthful environment.
