## FOR FARM AND GARDEN.

#### Old Sheep Not Desirable.

Many farmers keep old sheep too long, or until they are so old that they fait to return good profits. A writer on the subject sensibly advises that farmers should not purchase old sheep under any circumstances, but should fatten and sell to the butcher every old sheep which may be in their flocks. Old sheep which have even partially good teeth may be fattened at a profit, but it is a losing business to keep such sheep in the flock, and the best sheep-farmers will pick out all such animals and fatten and sell them as soon as practicable.

#### Drying Cows.

An English dairyman, Mr. George Simpson, has found to his cost, that the usual practice of drying continuous milkers, giving from twelve to sixteen quarts daily, does not answer at all. Instead of trying to dry cows giving large quantities of milk, he now finds it better to turn them loose in a box and feed them on oat straw. By this means the flow of milk is reduced, and gradually they dry themselves, no evil effects traps and a shopful of poisons. following. The practice of suddenly checking the flow of milk of good milkers, by the common method, resulted, in his case, in three of his cows slipping their calves within forty-eight hours after the drying process began. Whenever it was attempted to dry large milkers at once, the organs became inflamed. Dairymen will find it highly important to pay particular attention to their cows, especially those of the Jersey and Guernsey breeds, which are great milkers.

#### Chemical and Yard Manures.

The results of five years of experiments with commercial and barn-yard manures on the Agricultural College Farm at Columbia, Mo., as set forth in a recent report on the same by Prof. J. W. Sanborn, are briefly as follows:

"In good years, with a plentiful supply of moisture, chemical manures gave a larger wheat yield than yard manure, while in dry years the result was the reverse. The gain of land treated with chemicals over that on which no fertilizer of any kind was used was mostly or possibly wholly due to the nitrogen in the chemicals. Chemicals may be uselessly used, and it is such misuse, or unintelligent use, that gives rise to the cry that they are valueless.

Prof. Sanborn advises farmers to attempt to use chemicals (not including lime, plaster or salt) only after intelligent buying, a careful study of soil by comparative tests, and then on horticultural crops mainly, including potatoes. This advice will not apply, however, when wheat approximates \$1 a bushel, or when soils are largely deficient in potash or phosphoric acid.

him too, after, evidently, a severe contest. The next one was routed as soon as his presence was discovered and the cat caught him in the field. But a ratcat 13 short-lived and a poultry-house cat requires special training. When my present young cat was introduced to her charge, her first act was to catch a young chicken, but she was kindly

persuaded to let it go uninjured. A little pains were taken to show her all the chickens and that they belonged there, and she never caught another. Cat-doors in the doors admit her to the stables from the poultry-house, and she guards the meal bins and all places where grain is fed. She has all the privileges of the house-cat in the daytime, goes and comes at pleasure, but at night she is always on duty. She is on familiar terms with all the animals and rubs herse'f against the hens as she moves about the house as unconcernedly as against the legs of any member of the family who pets her. She is equally at home on the back of a cow or horse or in a rocking-chair by the fire. But wee to the rat or mouse that ventures into her dominion. She is worth more than a wagon load of

Painting a Farm Wagon.

An Illinois farmer says in the New York World: "Farm wagons need an occasional repainting if for no purpose but to preserve them. This is a job any handy man or boy can do in leisure time. Begin by thoroughly cleaning the wagon and getting all grease off the hubs. Where paint is chipped off smooth down with and old file, go over the whole wagon with sand-paper, till you have a nice smooth service. Then set the wagon up on boxes placed under the axles, dust it well and proceed to paint. For the running part and wheels choose a good, strong-bodied color, with white lead for a basis. I buy the colors that come ground in oil, and put up in tin boxes, and have them mixed at the paint shop with boiled oil, a little turpentine, carriage varnish and brown Japan dryer. Now with a flat bristle brush (one that is a httle worn works easiest), put a heavy coat of paint on the body of the wagon. Then do the running gear, and lastly the wheels. When the paint is perfectly dry, fill up any cracks and places that need it with putty, colored with dry paint to match the groundwork. Then give a second coat of paint. When hard again rub it over with a bunch of curled hair to keep the varnish from 'crawling,' and give a tolerably heavy but

QUAINT AND CUBIOUS.

#### Evansville, Ind., boasts a child born with two heads. It died shortly after being born. New Brunswick was separated from

Nova Scotia in 1785. Entered into legislative union with Canada 1867. In Rio Janeiro, Brazil, drunkenness 18 almost unknown. It is said that this is owing to the large consumption of coffee.

The duel between Alexander Hamilton and Aaron Burr, by which the former lost his life, took place at Weehawken, N. Y., July 11, 1804.

In New York hospitals the discovery has been made that attendants become intoxicated through drinking the alcohol from the battles of specimens. The last sailing vessel built for the

United States navy was the Constellation, completed in 1855. She is at the present time the practice-ship at the naval academy.

A sweet potato, measuring four feet and one inch in length and two inches in diameter, and grown in J. C. Townsend's garden in East Gainsville, was exhibited in East Gainsville, Ga., rccently.

A colored woman, the wife of Willis Ellis of Albany, Ga., gave birth the other day to twin boys. They are said to have weighed thirty-seven poun ls, one turning the scales attwenty pounds, the other at seventcen, the heaviest babies ever known.

At West Point there is a dog which belongs to the band, and every afternoon at dress parade the dog stations himself near the cannon which is fired at sunset. The dog watches intently for the discharge, and then starts down the hill to look for the ball. This he has done for years.

Of the seventeen presidents of th United States, cleven were college grad" uates. Of twenty vice-presidents, ten were college graduates. Nineteen secretaries of state out of twenty-nine were college graduates, while thirty out of forty-one associate judges of the supreme court were college men.

A woman, in order to decide whether her canaries had eyes for color, placed in their cages two bathing-cups, one of white-ware, the other of pink glass. The birds looked at the two cups critically for an instant, and then both fluttered into the colored one, and since that won't bathe in any other.

#### Brittle Hoofs.

Horses are frequently troubled with brittle hoofs, caused by deficiency of water in the bone. This is caused in various ways --- fever of the feet, or the common founder, inflammation of the interior of the foot, exposure to fermenting manure or filthy stables, by which the horn is saturated with moisture containing ammonia, leaving the being consumed, leaving the shrivelled foot covered with mud; or even conand dry cells behind to form the scab. tinued hot or dry weather or an unpreventing the rot is powerless against healthy condition of the system will produce this trouble in the feet. The the scab. I once planted nine short rows of potatoes, applying the following horn becomes dry and granulated, and separates very easily, crumbling or washes to the sets before planting: A weak solution of blue vitriol, known as splintering away until there is scarcely crust enough left to fasten a shoe upon. sulphate of copper; a solution of green The remedy is, of course, to remove the vitriol, sulphate of iron; a solution of cause and restore the moisture. Frecorrosive sublimate, one ounce to a gallon of water; strong suds of quent washing of the feet with cold water, with attention to the health, and to give the horse clean bedding and .an very good, as also the boiling water. earth floor to stand upon, or else a deep bed of sawdust, will prevent it or cure it in many cases. Glycerine and water may appear, is considered a recommenin equal parts are an excellent dressing for the hoofs. An occasional soft feed, as bran washed with a little linseed, is also usefu!, because it keeps the horse in good health and cool. Tar is sometimes used as a hoof dressing with advantage, but it needs caution in its application.

The Rat-Cat in Poultry-Runs. O. S. Bliss says in the New York Tribune: The best protection against rats and mice in the poultry-runs is a good well-trained cat. If it is practically impossible to exclude vermin of this kind by building against them, and if by any art the runs are once cleared. they are liable to become infested anew almost any day. I do not believe a dozen rats have been bred on my premises in as many years, and yet every little while a colony of them put in an appearance. But the poultry-house cat does not permit any increase in numbers, and the last member of the colony rarely survives a week. Under my system of feeding there is always plenty of food in the house at all hours to tempt them, and but for the constant watchfulness of the cat I have no doubt I should be overrun with them as some of my neighbors ara. Frequently a single rat comes, apparently on a tour of inspection. If he gets well established he is certain to in some manner attract others. Twice I have known a single rat to take possession of an unoccupied summer pigpen in which a quantity of old bedding was left over. They were secure from cats but not provided with food. The first one came when there was just snow enough so that his tracks could be seen. He burrowed his way into the poultry-house and got his colony established.

They had evidently visited the poultry-house in the absence of the cat,

cept that it must be rapidly and uni formly spread. Don't use the wagon till this work has had time to become perfectly hard,"

DR. PIERCE'S GOLDEN MEDICAL DISCOV-ERY acts powerfully upon the Liver, and through that great blood-purifying organ, cleanses the system of all blood-taints and impurities, from whatever cause arising. It is equally efficacious in acting upon the Kidneys, and other excretory organs, cleansing, strengthening, and healing their discases. As an appetizing, restorative tonic, it promotes digestion and nutri-tion, thereby building up both flesh and strength. In malarial districts, this won-derful medicine has gained great celeb-rity in curing Fever and Ague, Chills and Fever, Dumb Ague, and kindred diseases. If you have all, or any considerable number of these symptoms, you are suffering from that most common of the American maladies-Bilious Dyspepsia, or Torpid Liver, associated with Dyspepsia, or or Indigestion. The more complicated your disease has become, the greater the number and diversity of symptoms. No matter what stage it has reached, Dit. d Prence's GOLDEN MEDICAL DISCOVERY will subdue it, if taken according to di-trections for a reasonable length of time. If not curred, complications multiply and Consumption of the Lungs, Skin Diseases, r Heart Disease, Rheumatism, Kidney Dis-ease, or other grave maladies are quite d

Mrs. I. V. WEBBER, of Yorkshire, Cattaraugus Co., N. Y., writes: "For five years previous to taking 'Golden Medical Discovery' and 'Pellets,' I was a great sufferer; had a severe pain in my right side continually; was unable to do my own work. I am now well and strong.".

## "FOR THE BLOOD IS THE LIFE."

and good digestion, a fair skin, buoyant spirits, and bodily health and vigor will be established.

Thoroughly cleanse the blood, which is the fountain of health, by using DR. PIERCE'S GOLDEN MEDICAL DISCOVERY, and good digestion, a fair skin, buoyant spirits, and bodily health and vigor will be established. GOLDEN MEDICAL DISCOVERY cures all

A medicine possessing the power to cure such inveterate blood and skin diseases as the following testimonial portrays, must certainly be credited with possessing properties capable of curing any and all skin and blood diseases, for none are more obstinate or difficult of cure than Salt-rheum.

"COLUMBUS, OHIO, Aug. 18th, 1887. WORLD'S DISPENSARY MEDICAL ASSOCIA-TION, 663 Main Street, Buffalo, N. Y.: Gentlemen—For several years I have felt it to be my duty to give to you the facts in rela-tion to the complete cure of a most agrea-

**AND RHEUMATISM.** If *Cleatement*—For several years I have let it to be my duty to give to you the facts in relation to the complete cure of a most aggrated case of salt-rheum, by the use of your "Golden Medical Discovery." An elderly lady relative of mine had been a great sufferer from salt-rheum for hywards of forty years. The disease was most distressing in her hands, causing the skin to crack open on the inside of the fingers at the joints and between the ingers. She was obliged to protect the raw places by means of adhesive plasters, salves, ointments and bandages, and during the winter months had to have her hands cresed daily. The pain was quite severe at times and her general health was badly affected, paving the way for other diseases to creep in. Catarrh and rheumatism caused a great deal of suffering in addition to the salt-rheum. She had used faithfully, and with the most commendable perseverance, all the remedies prescribed by her physicians, but without obtaining relief. She afterwards began treating herself by drinking teas made from blood-purifying roots and herbs. She continued this for several years but derived no benefit. Finally, about ten years ago, I chanced to read one of Dr. Pierce's small pamphlets setting forth the merits of his 'Golden Medical Discovery' and other medicines. The name struck

my fancy, and seeing that it was essentially a blood-purifier, I im-mediately recommended it to the old lady who had been so long a sufferer from salt-rheum. She commenced taking it at once, and took one bottle, but seemed to be no better. Hewever, I realized that it would take time for any medicine to effect a change for the better, and encouraged her to continue. She then purchased a half-a-dozen bottles, and before these had all been used she began to notice an improvement. After taking about a dozen bottles the half-a-dozen bottles, and before these had all been used she began to notice an improvement. After taking about a dozen bottles she was entirely cured. Her hands were perfectly well and as smooth and healthy as a child's. Her general health was also greatly improved; the rheumatism entirely left her, and the catarrh was almost cured, so that it ceased to be much annoyance. She has enjoyed excellent health from that day to this, and has had no return of either salt-rheum or rheumatism. The 'Discovery' seems to have entirely eradicated the salt-rheum from her system. She is now over eighty years old, and very healthy for one of such extreme age.

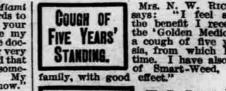

extreme age. I have written this letter, of which you can make any use you I have written this letter, of which you can make any use you see fit, hoping that some sufferer from sait-rheum might chance to read it and obtain relief by using your 'Golden Medical Discovery' -for 'Golden' it is in its curative properties, and as much above the multitude of nostrums and so-called 'patent medicines,' so zealously flaunted before the public, as gold is above the baser nostrums and so-called 'patent medicines,' so before the public, as *gold* is above the baser Respectfully yours. F. W. WHEELER, 182 21st St."

### CONSUMPTION, WEAK LUNGS, SPITTING OF BLOOD.

GOLDEN MEDICAL DISCOVERY cures Con-sumption (which is Scrofula of the Lungs), by its wonderful blood-purifying, invigora-ting and nutritive properties. For Weak Screece Coughs, it is a sovereign remedy. While it

CONSUMPTION. BOLOMON BUTTS, of North Clayton, Miami Co., Ohio, writes: "I have not the words to express my gratitude for the good your 'Golden Medical Discovery' has done my tor after another I finally gave up all hope of relief. Being very poor and having but one dollar in the world, I prayed to God that he might show me something ; and then it seems as though some-thing did tell me to get your 'Golden Medical Discovery.' My wife took it as directed, and as a result she is so she can work now.'

BAINED

Mrs. N. W. RICE, of Neurfane, Vermont. says: "I feel at liberty to acknowledge the benefit I received from two bottles of the 'Golden Medical Discovery,' which cured a cough of five years' standing, and dyspep-sia, from which I had suffered for a long time. I have also used Dr. Pierce's Extract of Smart-Weed, or Water Pepper, in my
