Here's a rat story, that is not a story, as the truth of it is vouchered for by one of our best citizens.

A lot of meat was packed away in a wooden trough of ante-bellum make, and a wire screen was placed over it. This meat-man expected to perish the rats; but not so, the fresh-meat-appetite-inclined animals gnawed a hole through the screen and were feasting for several days on the article for which they have a weakness, before the burglary was found out.

THE ST. CLOUD.

A Magnificent Building—A Splendid Addition to the Town—The Stockholders and the Men who Built It.

When an association of men, prompted by public spirit, and with an eye to the material advancement of the community and with no hopes of making what is called "big money" come together and with a union of purpose and purse erect in the heart of a town such a building as is the subject of this article, it then becomes the pleasant duty of the press to voice the appreciation and debt of gratitude due them at the hands of every citizen of the town and surrounding community.

Concord now has a hotel which, in the point of beauty and completeness, is not surpassed in the State. The architectural work, the elegance of its arrangements and the accommodations it will afford, unite in making it a building equal to any of its kind anywhere. Before we go to press again this magnificent hotel will have received its finishing touches.

Being located on the corner of Main and East Depot Streets upon the site of the old American Hotel, the picture of which is yet an eye-sore when compared with the present, the St. Cloud is in the heart of the business part of town. It has a frontage of 77 feet, with a depth of 60 feet. The structure is brick and is three stories in height. All this is inclusive of a two story wing attached, for cook room, bath rooms, &c. The front of first story, 124 feet in height, is glass; on the second a balcony runs the full length of the building, and the third at the top is ornamented with wood work of beautiful design. There are four entrances—one specially for the ladies.

On the third floor there are 15 rooms, double and single, with window facing, doors and wall wainscoting of natural pine. The third story has 14 rooms with the wood work constructed of ash. The first story is divided up into dining room, office, sample room, cloak room and barber shop.

The rooms are being furnished in handsome style and will be lighted by gas, and are provided with electric call bells. We shall refrain from an attempt to describe the paneled stairways, which surpass any thing of the kind in these parts. A sky-light admits light, which added to by numerous windows shows up the beauty and perfection of the work and designs. Every convenience found at a well regulated hotel is to be found in the St. Cloud.

Capt. A. H. Propst, the contractor, has another "great big" feather in his cap. He, with the assistance of Messrs. N. P. Correll, E. S. Shuman, H. D. Moore, D. M. Howard, W. W. Deaton and J. M. Smith, has done a job, which for neatness, beauty and all that could be said about the best is unsurpassed anywhere. It is only necessary to say that Ed. F. Correll is doing the painting and hard oil-finishing to tell of that part of the hotel's beauty.

Capt. J. W. Clarke, of Rutherfordton, a hotel man of experience and popularity, will be manager. The St. Cloud opens January 1, 1889.

The company that built the hotel is composed of representative and enterprising business men, whose names tell more than we can write Messrs. J. M. and W. R. Odell, D. F. and J. W. Cannon and G. M. Lore.

I have some Texas Horses, and they must go inside of the next thirty days. M. J. CORL.

Some Big Nuggets. As promised our Locust Level correspondent last week, we give the following particulars as to the gold found in the Reed Mine.

The first piece of gold from this mine was found in 1799, by Conrad Reed, a boy about 12 years old. He and his brother were playing in a branch on Sunday, and seeing a yellow substance in the water, carried it to the house, where it was used for three years to hold the door open. It was sold to a jeweler in Fayetteville for \$3.50. This piece weighed 28 lbs.

Single pieces of various weights were found afterwards, as follows: In 1804, 9, 7, 2, 2, 1 1/2 lbs. In 1824, 16, 9, 8 lbs. In 1835, 134, 44, 4, 1, 8 lbs. The weight of these pieces amounted to 115 pounds, all steel-yard weight.

Mr. John Reed's partners were Frederick Kiser, James Love and Martin Klifer.

Married. Mr. Morrison H. Caldwell was married last Wednesday to Miss Rosa McCorkle of Salisbury. Mr. Caldwell is one of our Cabarrus young men, and practised law here several years. He is now engaged in a lucrative business in Knoxville, Tenn. Miss McCorkle had charge of the music department of the Female Academy here last year, and has in this place a number of friends and admirers. THE STANDARD congratulates both, and our best wishes go with them to their future home.
