An Aerolite Over Atlanta.

Dispatches say that a most interesting astronomical phenomena occurred over Atlanta and surrounding places on the night of August 30th. An aerolite passed over from north to south, carrying such brilliancy as to dim the electric lamps. When at an angle of about 45 degrees from the city it exploded and a sound followed as of a distant cannon. It required about one minute for the sound to arrive.

FITZHUGH-LEE'S IDEAS.

Presents a Report to the War Department on What He Thinks Ought to be Done in Cuba.

Washington, Sept. 1.—In a report presented at the War Department from Fitzhugh Lee, commanding the provinces of Havana and Pinar del Rio, that officer makes a number of recommendations for reform for the betterment of the inhabitants. Among these are that an early census of the island be taken; that the question of suffrage be considered in all its aspects, and a decision reached regarding the same; that a modern system of jurisprudence, as far as it can be made applicable be generally introduced, so that elective officers belonging to it can be voted for at the general elections; that a general election be ordered for a President, or Chief Magistrate, Vice-President and a Congress or Legislature to consist of two branches, and all other officers of a republic, as well as municipal elections in the various municipalities.

He also recommends that the United States shall keep a strict supervision of the affairs of Cuba until a republican form of government has been adopted by the people; that the island shall still be garrisoned by troops of the United States in order to protect the lives and property of citizens of the United States and those of other foreign countries residing in Cuba, preserve peace, suppress disorder and maintain the supremacy of civil law wherever and whenever may be necessary; that the future of the Cuban republic shall be vested in the people and their representatives, so far as it relates to the question of an American protectorate or annexation to the United States.
