TIRED OUT.

There's many a farmer's wife sits on the porch in the growing shadows of a summer evening, knowing to the full what it another ounce of effort left in her. But she knows how sound her slumber will be and how refreshed

the morning will find her. That's the tiredness of a healthy woman. But it's another thing for the sick woman to feel tired out, Rest only seems to increase her suffering. Just as in profound jars the ear more forcibly, so now that she

has stopped this tired woman feels more acutely the aching back and throbbing nerves. Sick women, hundreds of thousands of them, have been made well by the use of Dr. Pierce's Favorite Prescription. establishes regularity, dries weakening drains, heals inflammation and ulceration and cures female weakness.

"Words cannot tell what I suffered for thir-teen years with uterine trouble and dragging-down pains drough my hips and back," writes Mrs. John Dickson, of Grenfell, Assinibola Dist., N. W. Alarming Decrease in Birth Rate. George F. Shrady, of The New York Medical Record, declares that the decrease in the birth rate among American mothers is alarming and that a decreasing population will soon be the result, as in France today. The demands of society and our life in flats, "where a baby is more unwelcome than a dog," are given as reasons. Our Anglo-Saxon prudery, Dr. Shrady says, stands education on the subject.

Hypnotism Not Remedial. The commission of mental disease experts appointed by the German ministry of education to investigate the healing power of hypnotism has reported that it is essentially worthless and that its use by laymen is dangerous. Its only virtue, they-assert, is in rare instances where it can be used to remove symptoms through suggestion.
