REV. SAM JONES WRITES ON HIS

I returned home yesterday unexpectedly, the high waters shutting me out from the regions round about St. Louis. I had a very pleasant trip through Texas, Ohlahoma and Indian territory. One could scarcely believe their own eyes as they looked upon the devastation caused by the cloud-bursts or water-spouts in sections of Oklahoma. The towns, the railroads and the farmers "caught it in the neck," as the boys sometimes say. The railroads suffered immensely. I saw two great mogul engines lying on the side of the track. They had stopped in the edge of the water overflowing the track. and before they could get away the track began sinking on one side and the engines turned over as gently as a bird falls, until they topple, and then down into the mud and water. I saw miles and miles of track where roadbed, ties, and rails were taken out by the flood, and the track was built up on crossties four, six or eight feet, and new track hid. It is marvelous how quickly these railroads can repair breakage. The Southern railway has just performed a herculean task, almost a miracle, in repairing its damage between Spartanburg and Greenville, S. C. If

mate of the value of their franchises.

But returning to the sights in Oklanoma, it has been three years since I have been in Oklahoma any length of time; the charming new cities, the magnificent farms, the wonderful opening up of new railway lines, the great activity in all lines, impresses one as almost incredulous. The Choctaw, Oklahoma and Gulf, (which is now a part of the great Rock Island system), which extends from Memphis to Amorilla, Tex., about seven hundred miles of chantauquas in Indiana, Illinois, ls prepared to do all kinds of dental work in the most approved manner.
