INTERESTING FACTS ABOUT NORTH CAROLINA.

(By the Associated Press.)

The cotton manufacturing industry in North Carolina used in 1912, 328,407,879 pounds of the raw product. In 1921-22 the amount used was 531,768,116 pounds. Figured in bales of 500 pounds each this is 1,063,536 bales of cotton.

The percentage of increase in the use of the raw product in this industry is relatively greater than that of any other state engaged in the cotton goods industry.

In 1912, 3,321,426 spindles were employed in the cotton mills of the state; in 1922 this number had increased to 5,605,102. Looms in use in 1912 were 58,961; in 1922, 74,740.

The spindle increase in North Carolina mills has been for each successive year since 1912 greater than that in any other state in the Union. The rate of increase since 1915 is 44 per cent.

In proportion the value of fine yarns manufactured in the state is greater in value than that made in any other state. In the value of ticks and denims the state leads the . nation:

his attention.

The Governor said he was not particularly interested in the audit report which is now ready for the legislative committee in charge of the investigation order-ed by the lawmakers some months ago and just completed. His principal purpose in going to Raleigh, he stated, is not to be there when the committee gets the audit report, but to attend to busiaess he left undone when he first came to were asleep in the house when the father Asheville.
