MR. EDWARDS ATTACKS

Senator Declares They Have Shot Down Hundreds in Cold Blooded Murder.

New York, Nov. 14 .- Senator Ed ward I. Edwards, of New Jersey, in an article published today in the December issue of the magazine "Plain Talk", estimated that the toll of lives taken by prohibition agents "must

run into four figures." Senator Edwards said that no nation-wide research has been made to establish the accuracy of his estimate. adding "as long as prohibition lasts statistics will never catch up with the number of persons killed by prohibition officers, federal, state and

municipal." "The federal men to date," he said "have slain about 200, and I have read the 'dispositions' from the treas ury department of 152 killings by federal agents, with 84 other cases where deaths have occurred at the hands of local officers."

Answering the question, "how do men die when prohibition agents shoot?" he wrote "they die many of them, in cold blood, shot in the back."
