The invention of that Superior and Com-Machine), marks one of the most important eras in the history of machinery, and when Machine), marks one of the most important eras in the history of machinery, and when we consider its great usefulness and extremely low price (\$25), it is very difficult to conceive of any invention for domestic use of more or even equal importance to families. It has great capacity for work; beautiful. smooth, and quiet movement, rapid execution, certainty and delightful ease of operation, that at once commends it above all others. The working parts are all steel, stong and durable, and will last a life time; the bobbins hold 100 yards of thread; the stitch is the firmest of all the stitches made, neat and regular, and can be regulated in a moment to sew stitches from an inch in length on coarse material down to the finest, so infinitesimal as to the hardly discernable with the naked eye, and with a rapidity rendering it impossible to count them as fast as made; it has more attachments than any other, and it does to perfection all kinds of heavy, coarse, plain, fine, or fancy needle sork with case, and far less above than required oc other machines. It needs no commendation, the rapid sales, increasing demand, and voluntary encomiums from the press, and the thousands of families who use them, amply testify to their undoubted worth as a standard and reliable household ne essity, extending its popularity beach day. Written Guarantee for five years. Kept in order serge or charge; money refunded at once if not satisfactory.

It is the most solid, reliable, and satisfactory machine ever invented or all kinds of family work. It is an acknowledged unequivocal mechanical success, thoroughly, tested, and used in thousands of homes. An efficient, silent, rapid, reliable, and wer-read, helper to the weary wife or scamstress, it will do the work of a family for a life time, or it will earn from \$4 to \$5 per day for any one who wishes to sew for a living. This machine costs tess than half the price of any new machines of like quality. Has extra long, large-sized Shuttle, easily removed. Extra large-sized Shuttle, easily removed. Extra large-sized Bobbins, holding 100 yards of thread, doing away with the frequent rewinding of bobbins. It is built for strength and constant hard work. Interchangeable working parts, manufactured of fine polished strel, will run for years without repairs; is simple to learn, easy to manage, understood perfectly in an hour, and siways ready in a moment to do every description of heavy or fine work at less cost or trouble than any other machines at any price ever did, or can do.

Will sew any thing a needle can pierce, from lage or cambric to heavy cloth or harness, with any kind of thread, and will run off twenty yards per minute; it uses strong, straight needles, and never breaks them. It cannot miss or drop a stitch, ravel or break the thread. If you have any other machine, buy this and have a better one. The case and rapidity of its motion and quality of its work, are its best recommendations. It will hem, fell, tuck, braid, cord, bind, gather, quitt, tuffle, plent, fold, scallop, shirr, roll, baste, embroider, run up breadths, etc., with elegance, case and quickness, unsurpassed by any machine ever invented.
