A PAPER FOR THE PEOPLE

Entered at the Danbury N. C. Post-office as Second Class Matter.

THIS PAPER may be found on file at each of the following places...

OUR PRODUCTION.

Some of our people act as if they fear an over production of something to eat in this section. To such we would say, have no fears friends about that, let us assure you that there is not the least danger in that direction...

Now farmers of Stokes, we are not mad, nor do we want to make you mad, but tell you plainly, that it is a shame, that we should depend upon western farmers for our bacon, flour, corn, cabbage, potatoes, and many other things we have to eat, to keep soul and body together...

DRINK AT MEAL TIME. Little drink should be allowed at meals to weaken the digestive fluids. These are the saliva, gastric juice and bile.

Excuse us sis, but if you will let your street cars rest just a little while, and take your surplus to the fair...

on your money, and a further result will be the establishment of similar industries which will give you a shove even ahead of your older sisters. Yes we are talking to you. Walnut Cove will soon open one warehouse, this will be followed by others, with more factories, and soon she will be a tobacco town.

Many of our exchanges use patent outside, it may be that some of us would furnish better papers, if both, in and out were ready print. Lets do it, yes lets get our papers from the North ready printed on both sides, if any of our boys want to learn the printing business, we can send them up North to learn.

It is useless, perfectly absurd, to talk about building a town in Stokes, that will amount to much without manufacturers. We must have the town. Where will it be? and what will we manufacture? Tobacco is our staple, iron is our real strength...

"Like beget like," is no more plainly manifest, in any place, or business, than is the building of a town. One fellow opens a store in a new town and succeeds will, another, and another follows, until the business is overdone.

DRINK AT MEAL TIME. Little drink should be allowed at meals to weaken the digestive fluids. These are the saliva, gastric juice and bile. Bile is not found in a healthy stomach; if it is ejected in vomiting, it shows that the action of the stomach is inverted.

SAM JONES'S PARTY.

Sometimes a man gets where he is afraid he will hurt his party. I used to be a Democrat. I was born one, and raised one, and I stayed one as long as a Christian gentleman could.

There are four suicides in France among the men to one among women. This is accounted for because the women attend church and the men do not. This is a good place to note the fact that in the United States the women are much more religious than the men.

WHEN A NOTE UNDER SEAL IS BARRED. The question, "When a sealed note is barred by the statute of limitations," puzzled several of our best business men recently.

INGERSOL ON RICH AND POOR. The rich have scorn and contempt for the poor, the poor have envy and hatred for the rich. There must be some way for the loving poor and the sympathetic rich to get acquainted.

STATE GLEANINGS. Kernersville News: The increase in weight of this year's tobacco will tend largely to make up any lack of acreage.

LAND WARRANTS WANTED. According to the late act passed by Congress almost every person drawing a Pension is entitled to a Land Warrant of 100 acres.

NOTICE. Having duly qualified as Administrator of the Estate of Margaret Carter Deceased, all persons indebted to said Estate are requested to make payment to me at once.

LAND SALE. As commissioner in a decree made at Spring Term 1887 of the Superior Court of Stokes county in case of W. P. Steel against W. R. Carter and B. C. Pringle, I will sell for Cash at the court house door in Danbury on Monday the 7th day of November 1887 at 12 o'clock m. a tract of 275 acres of land in Snow Creek Township adjoining the lands of Saml Steel, Thomas Hutchins...

HE WAS GREATLY MISTAKEN.

A Maryland Chemist Reckoned Without His Host.

I live in the midst of the malarial districts of Maryland, near the city of Washington, and am exposed to all the dangerous influences of the impure air and water of that region.

Being naturally of a strong constitution, I had frequently boasted that no chills and fever or other malarious complaint would ever trouble me.

This was my experience and the condition in which I found myself six months ago. I first noticed that I did not feel so sprightly and vigorous as was my wont to do. I felt tired and enervated. Soon I noticed a distinct and distressing back ache would make its appearance in the afternoon, increasing in severity if the exercise was more than usually violent.

The cold stage was marked with chattering of the teeth, severe rigors passed over me, and no amount of clothing could keep me warm. The chill was succeeded in turn by the fever, in which I seemed to be burning up, the congestion in my head produced a violent pain in the frontal portion and a heated sensation of the eyelids, with an indescribable aching of the lower limbs.

I drugged myself with quinine, and obtained some relief. But my respite was of brief duration. I was now so much reduced that I could hardly walk or stand upright. My disease soon culminated in a continued malarial fever which kept me closely confined for about a week.

During all this time, it must be understood that I did not neglect medical treatment. All the most powerful remedies were tried, such as liquid arsenate of potash, valerianate of iron, mercury, bromide of potassium, chloride of bismuth, chinoidine, chinchonidia, quinine and several others. All this I did under the advice of eminent physicians.

It was while I was in this deplorable condition that the claims made for Kaskine, the new quinine, as a specific for malaria, were first brought to my attention. I knew nothing of its value to justify my having any confidence in it, but as everything else had failed I deemed it my duty to try it, so I began its use, and its prompt and radical effects were of the nature of a revelation to me.

This was about the first of January, and since then I have experienced no recurrence of the malarial symptoms in any form. A remedy of such exceptional virtue for the cure of malaria ought to be commended and universally made known. I have therefore urged it upon the attention of my friends, several of whom have used it with like good results in every case, and it is with the greatest pleasure and sincerity that I commend Kaskine to sufferers from malaria everywhere.

Respectfully yours, J. D. HIRD, B. A., Assistant Chemist Maryland Agricultural College. P. S.—Should any one wish to address me as to the genuineness of the above letter, I will cheerfully respond.

Other letters of a similar character from prominent individuals, which stamp Kaskine as a remedy of undoubted merit, will be sent on application. Price \$1.00, or six bottles, \$5.00. Sold by Druggists, or sent by mail on receipt of price.
