LATE ELECTIONS.

Elections were held in ten States Tuesday Nov. 8. The vote in New York City for Cook, Dem. candidate for Secretary of State, is 110,781, which is 9,366 in excess of the combined vote of Grant, George, Hall and Huntington. Tracy, Dem., is elected to Congress in New York by about 2,300 majority. The Democrats in Virginia will have over two-thirds majority in both branches of the Legislature. In Pennsylvania the Republicans elect the State ticket by a plurality of about 83,000, but the vote shows a Democratic gain of about 10,000, as compared with the vote for the previous two years. In Iowa the Legislature is Republican by above 45 on joint ballot. The Republican ticket in Massachusetts is elected by a largely increased majority. The election in Maryland went Democratic. The coalition formed of kicking Democrats and Republicans did not carry.

THE FREEZING POINT OF WATER.

Ice formed in this locality last Wednesday morning, although the thermometer indicated a temperature of 33 degrees. This we know to be a fact, for we saw the ice and personally examined the thermometer, which is a standard instrument. The ice was on the ground, or on a plank very close to the ground, while the thermometer was suspended on the wall of a building, but in the open air. Did this make the difference in temperature, or will ice form in a temperature greater than 32 degrees? - *Woolingham Spirit of the South.*

At 32 degrees under ordinary circumstances water begins to crystallize, or as we commonly say ice forms; but if the water is much agitated by high winds, ice will form at a higher temperature. It is likely, however, in the above instance, that the temperature at the ground was lower than that contiguous to the wall of the building, where the thermometer was suspended, and this difference may have amounted to 6 degrees. Water may be reduced to 35 degrees without freezing, if kept perfectly quiet; but if agitated, it will cease congelation to take place suddenly, and as ice is formed latent heat is liberated, and the temperature rises to 32 degrees.

WE ARE NOW ON THE ROAD to prosperity if we will just continue to make home supplies at home and limit our tobacco crop to what we can handle nicely; it will bring more money than a large crop poorly worked and cured. Now that the time is approaching for preparing plant land, we advise our people to prepare enough land in time to grow the plants you will require and prepare the land for all your crops, and remember the time has come when a good article will only command a good price. We have been impoverished by growing one crop, but we can get our home supplies at home, and we will soon have plenty of money and everything we need.

WE HAVE JUST HAD in our hands the first four volumes of the Colonial Records of this State edited by Col. Saunders, and published by the State. As analytical index to each volume would facilitate reference to the contents.

THE MORE PROMINENT indications of the late late elections point to the certain election of a Democrat to succeed Mahone in the United States Senate, and the probable re-appointment of Cleveland for the Presidency, and the probable appearance of his name.

THE DEFEAT of Judge Bradley, the Democratic candidate in the second district of Rhode Island, will give the Republicans a majority of votes in the House. He owed his election last year to a belt in Republican party.

JACKSON, DEMOCRATIC candidate for governor of Maryland received a plurality of 9,601. The Legislature stands 22 Democratic, 4 Republican, 10 Messrs, 74 Democrats, 10 Republicans.

WHAT AILS THE NATION?

The Average Length of Life Decreasing - Not Pestilence - Not Famine - All our own Fault.

MODERN COOKING AND MODERN LIVING have brought it on. It comes upon us unawares. The patients have pains about the chest and sides, and sometimes in the back. They feel dull and sleepy; the mouth has a bad taste, especially in the morning. A sort of sticky slime collects about the teeth. The appetite is poor. There is a feeling like a heavy load on the stomach; sometimes a faint, all-gone sensation at the pit of the stomach which food does not satisfy. The eyes are sunken, the hands and feet become cold and feel clammy. After a while a cough sets in, at first dry, but after a few months it is attended with a greenish colored expectoration. The patient feels tired all the while, and sleep does not seem to afford any rest. After a time he becomes nervous, irritable and gloomy, and has evil forebodings. There is a giddiness, a sort of whirling sensation in the head when rising up suddenly. The bowels become constive; the skin is dry and hot at times; the blood becomes thick and stagnant; the whites of the eyes become tinged with yellow; the kidney secretions become scanty and high colored, depositing a sediment after standing. There is frequently a spitting up of the food, sometimes with a sour taste and sometimes with a sweetish taste; this is frequently attended with palpitation of the heart and Asthmatic symptoms; the vision becomes impaired, with spots before the eyes; there is a feeling of great prostration and weakness. All of these symptoms are in turn present. It is thought that nearly one-half of our population has this disease in some of its varied forms. Shaker Extract of Roots (Seigel's Syrup) changes the ferments of the Digestive organs so as to convert the food we eat into a form that will give nourishment to the feeble body, and good health is the consequence. The effect of this remedy is simply marvelous. Millions upon millions of bottles have been sold in this country, and the testimonials in favor of its curative powers are overwhelming. Hundreds of so-called diseases under various names are the result of indigestion, and when this one trouble is removed the other diseases vanish, for they are but symptoms of the real malady.

Testimonials from thousands of people speaking highly of its curative properties prove this beyond a doubt. Sold by druggists.
