It seems probable that the first railroad to this place will come from Virginia we had hoped that it would extend into our State for we consider that it would be one of the best freight roads in the State. But we must be content, of course, with any road, let it come from where it may. We can give it as opinion that a road is being built towards this section of Stokes and will not be so long reaching as some think.

IN PASSING THROUGH part of Virginia, Maryland, Pennsylvania and New Jersey a few weeks ago, and tassel, apparently one half of the crop was not more than waist high; in fact the quantity seemed so equally divided that we were unable to determine which was intended for the principal crop, the early or the late one. The corn in those States has only a third as much stalk as ours. The ear is smaller, but it has two or three times as many stalks on the land to the square yard. We are behind the times in this part of the South, and stick too closely to the old rut; in some cases it will pay us to go by new roads. Could we not profit by the mode of farming further north?

The Reporter-Post should be a regular weekly visitor to every family in this county both for the good of the families and for our own sake, and for this one, among a number of reasons, we are endeavoring to do a good service by acquainting the people with the county's history and resources, thereby instructing our people in what they ought to know, and at the same time drawing the attention of individuals from abroad who may be induced to make investments here and introduce industries among us. And while we are working for the interest of the county, at large, we feel we ought to have its substantial support in the way of a liberal subscription list, for as Bradford who published the first Bible in America under the colonial government, at Philadelphia, and in his concluding prospectus printing is costly, and when we say "printing is costly" we are not taking into account any remuneration for the preparation of the matter for the paper, and for conducting the business.

We furnish a paper which to say the least will not suffer in comparison with any county paper in the State; indeed there are original articles, covering a vast and varied range of subjects, regularly contributed to this paper which we consider would do credit to the more pretentious city dailies of the State. Much attention is given in its columns to matters of more than passing interest to the farmer, and the farming interest of this county affects every one of its inhabitants it is as yet paramount to every other interest in this country. The very latest general and state news is given on the columns set apart for that department; and its miscellaneous sections are carefully sifted from its sixty exchanges. Sample copies sent on application. Send on your money at once and then talk to all your neighbors afterwards and try to get them to subscribe.
