## The Point of View.

A BESUME OF THE SITUATION PO LITICAL - NATIONAL, STATE AND COUNTY
The Republican managers of President Roosevelt's campaign appear to have the most supreme confidence of success, and a dispatch from New York states that the leaders at headquarters have practically stopped work, claiming that Roosevelt will get 290 votes sure, leaving several States in doubt. This claim is said to be bised upon a canvass of the entire copintry.
The total vote in the electoral college is 476 , so that 239 votes are necessary to elect.
Another dispatch from New York Mónday morning says that the Democratic National Committee has made a canvass of the doubtful States and reached the conclusion that New York, New Jersey, Connecticut, Maryland, Delaware, West Virginia and Indiana, and a majority, if not all, of the Rooky Mountain States, will go for Parker. Hlinois and Wisconsin are classed as doubtful.
So, it is readily seen to the calm and dispassionate observer, that both sides are claiming everything, and that success is not assured for Vion The mhtre-sergative ion The m
asual supreme confidence of the Republicans has been largely dissipated. Chairman of the $\mathrm{Re}-$ publican Executive Committee N. o. Petree claims that he will land his ticket by 374 majority. Chairman J. D. Humphreys claims that the Democrats are going to win sure by majorities ranging from 150 to 275.
While the prospects of course favor the election of some of the Republican candidates, there is a sub-current moving in favor of some of the Democratic candidates that may produce a tide before the 8th of November that will sweep in the whole Democratio ticket.
There is considerable disaffection among Republicans, while Democratic harmony has never before been so complete.
BOTH SIDES MAKE CLAIMS.
Taggart is Satisfied and Cortelyou Claims 290 Electoral Votes For Roosevelt.

New York, Oct. 25.
"I could not be better satisfied
with the prospects for Judge Parker's election," said Chairman Tag. gart at Democratic national headquarters today. When asked if he could give any figures or name the States which he depended upon to lect his candidate, he said:
'I have never in all my life given out figures before election. I do not believe it is good policy. The national committee will doubtless discuss the advisability of such a course this campaign, but it is quite doubtful if we shall make public any estimates.
"If we do give out any they will be Mr. Targgart's own figures and no bluster?
The managers of the Republi-

## SCOPE OF THE WORK :

The diseases and diseased con ditions which are amenable to treatment by Physiological There peutics, are unlimited in numbe and kind
It is more especially the chron ic diseases, that represent ta field in which physiological treat ment has been productive of goo results even in cases which a ordinarily looked upon as beit incurable.
It is impossible to over estim the vast amount of good wh can be done by this method.
ordars, malposition) etc.
Hip joint disease and bone de ormities in children (orthopedic (argery) yield splendid results if handled according to physiological principles.
It would lead too far to approximately define the good which may be done with physiological methods in diseases of the blood, of zutrition, of internal organs ike kidneys, liver, heart, bladder and in catarrhal troubles of every lescription.
DEAENESS CANNOT BE
By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cuze deafness, and that is by coustitutional remedies. Deafness is cansed by an inflamed conFy Fyon of the mucous lining of the Tabe. When this
