NEGLECTING OUR SOIL.

An Interesting Article On the Subject By Mr. I. G. Ross, One Of the County's Most Scientific Farmers.

Locust Hill Farm, N. C.
Sept. 10, 1907.

Mr. Editor :

Our soil seems to be so neglected and as it is so important to the life of all plants and animals, I wish to say a few words in behalf of it, as it is going from us every time we have a rain into the creeks and rivers. It is time for us to stop and think, and see if we can't use some precaution against it. If all of it should be swept away at once, life would be extinct upon this earth. When we allow our lands to wash away we are wasting our landed estates just as a son would waste his father's estate. We are also responsible to God as tillers of the soil how we preserve and take care of it. Our preachers tell us that ignorance is no excuse. So we can't plead that, for all the unsightly gullies that we see in passing over the country. The soil is a great reservoir for preserving the air, heat and water, the three essential things to the growth of all our plants. Our soils should be in a condition in the spring so they could return the warm air and water that falls upon it, so it may become warm, as it requires heat to unlock the plantfood that the cold winter has locked up. The heat also hatches the microbe that is so necessary for the extension of nitrogen from the air and depositing it in the plants that they live upon. Water is also needed, as that helps to warm the soil in the spring, and it also dissolves the plantfood that heat has unlocked and it carries it to the roots of the plants that have started to grow and percolate through the soil, making it porous so the little roots can penetrate it and reach out further for more food, as that nearest to the plant becomes less nourishing.

I have tried to tell you some of the benefits of heat and water in our soils, now I wish to tell you how to preserve these. One of the first and greatest is humus, as that opens the pores of the soil so the heat and water can penetrate it. The warm April rain comes down and pushes the cold winter water lower down in the soil, leaving the warm water in the surface soil, then it is very important to hold that water, and the best means that can possibly hold it is to begin the work of the plow and keep a dust mulch on it as water will not evaporate through it but will percolate through it. To show that water will not come up through it, if we take a brick and soak it in water and lay a sponge on it the brick will not take any of the water from the sponge but soak the sponge and lay it on the brick and the brick will take all the water from the sponge, showing that water will leave a porous soil and go to a solid and not come up through the porous one.
I. G. ROSS.

CURES BLOOD, SKIN DISEASES, CANCER, GREAT-EST BLOOD PURIFIER FREE.

If your blood is impure, thin, diseased, hot or full of humors, if you have blood poison, cancer, carbuncles, eating sores, scrofula, eczema, itching, risings and bumps, scabby, pimply skin, bone pains, catarrh, rheumatism, or any blood or skin disease, take Botanic Blood Balm (B. B. B.). Soon all sores heal, aches and pains stop and the blood is made pure and rich. Druggists or by express \$1 per large bottle, 3 bottles for \$2.50 or 6 bottles for \$5.00. Sample free by writing Blood Balm Co., Atlanta, Ga. B. B. B. is especially advised for chronic, deep-seated cases, as it cures after all else fails.

Joe Jacobs Clothing Company

THE LEADING CLOTHIERS,

247 Main Street,

Winston-Salem, N. C.

We have been in the Clothing business for THIRTY-ONE successful years, and our motto today is to Sell You Honest Clothing at Honest Prices.

Brown = Rogers Co.

WINSTON-SALEM, N. C.

Stoves, Ranges, Paints, Oils,
Bickford & Huffman Superior and
Ontario Drills,
Disc Harrows, Oliver and
Lynchburg Plows,
Gasolene Engines, Belting, Etc.

Your Interest Our Interest.

For thirty five years it has been the pride of this warehouse to work and so conduct its sales that at all times the interest of our patrons comes first. No warehouse has secured for its patrons a higher average price than Brown's at Winston-Salem.

No tobacco grower ever sold his crop at this house without receiving the full strength of our hospitality. Depend upon this house for the highest market price and the best accommodations and courteous treatment at all times.

But figures speak louder than words. The past year this market sold 15,477,245 lbs for \$1,290,109.05, an average of \$8.34.

Of this amount Brown's sold 4,118,435 lbs for \$360,306.09, average \$8.75, and again we say: YOUR INTEREST IS OUR INTEREST. Bring your first load of tobacco to us.
