**Running Barks.**

According to "Pid" Campbell, dog specialist and rabbit hunter, all dawgs don't have the same action when a fit or the running barks is on him. Some dawgs run, other drop dead apparently for a few minutes, and still some of them do other little stunts, he explained, but he said Roy King, of Danbury, had a dog that had all others beat for swift moving when his fit struck him. He said it went around something like a winding blade and moved so fast that you couldn't tell which end his head was on.

**A POORLY FERTILIZED FIELD**

**ONE-ARMED WORKER**

A man can't farm with one hand tied. A field can't produce as it should unless plenty of fertility is unloosed. And that means the right kind of fertilizer and plenty of it. Fields that aren't producing all they should are only part time workers. But why not make your land work full time. Why not profit by the experience of thousands of others and liberally apply Royster's and thereby reap the profit of bigger yields of better quality?

**FIELD TESTED**

Your acres will work harder for you if you will let them. All they ask is a square deal. Give them plenty of Royster fertilizer so they will have a chance to grow for you bigger acre yields of finer quality, hence more profit for you. For close to half a century Royster fertilizers have been tested in every sort of soil and under every condition. Under every test they have proven to be highest quality plant foods. Each year the demand grows bigger. A perfectly blended, perfectly cured, perfectly balanced formula for every crop. You can afford to pay a little more for Royster's because Royster's gives you the best return. There's a Royster dealer near you.
