A. W. McAlister and family, of Greensboro, are occupying their summer home at Piedmont Springs, arriving there on Tuesday of this week. Mr. McAlister is president of the Eliot Life Insurance Co. at Greensboro.

The Colonial Food Shop, which has for some time been under the management of Mrs. A. J. Fagg, is this week being taken over by James Jones and Fred Priddy, who expect to continue the cafe with the same excellent service which has been rendered in the past.

Finest Lilies

SCIENTIFIC methods of raising water lilies are producing finer plants in the United States than can be found anywhere else in the world.

A few years back, no one considered pond lilies of sufficient importance to spend any time on, but that enterprising Polish woman, Helena Rubinstein, discovered that water lily juice has a curious and beneficial effect on the skin.

Experiments proved that the juice must be fresh and as water lilies are seasonal, it seemed impossible to make any commercial use of her discovery. However, the United States is blessed with a variety of temperatures and by purchasing lakes and ponds in various sections, she was able to keep a continuous supply of the fresh flowers.

Hundreds of people are employed in their care and carloads of the fragile flowers are shipped in refrigerated cars to her laboratories in New York and Canada every year.

A Vienna doctor recommends garlic juice as a means of reducing weight or popularity?

The United States will proceed to comply with the naval "reduction" pact by building seven new cruisers carrying 8-inch guns.

Marjorie Best, 3, won a silver championship cup almost as large as herself in a swimming carnival contest at Bellar, Fla.

A six-week-old girl baby, found abandoned in an airplane near Baltimore, has been adopted by Mrs. Leo Steinmetz of that city.

Twelve members of a boys' social club in Brooklyn rescued John Chritto, his wife and six children from the top floor of a burning three-story building.

Presbyterian Dates At Presbyterian Churches

Pastor H. W. Hudspeth, of the Presbyterian churches, announces dates for services as follows:

Danbury, 1st Sunday at 11:00; 3rd Sunday night at 7:30.

Pine Hall, 2nd Sunday at 11:00; 4th Sunday night.

Sandy Ridge, 4th Sunday at 2:30.

Vaden's School House, 3rd Sunday 2:30.

Grow Enough Corn On Three Acres

Three acres of corn can be made to furnish the normal supply of this grain needed on the average one-horse farm in North Carolina.

"The usual one-horse farm will need at least 100 bushels of corn in a year," says Prof. C. R. Hudson, veteran extension worker and successful corn grower at State College. "A horse or mule will need about 60 bushels, the cow will need at least 15 bushels as meal, the hogs and chickens must have an ample supply and the folks will need some for food. At our present rate of yield, 20 bushels an acre, it will

take five acres to supply the hundred bushels needed, but why cultivate this acreage when three acres can easily be made to produce enough. Some farmers grow 100 bushels on one acre."

Mr. Hudson says that the essentials for successful corn growing are an adequate supply of food, especially nitrogen, an abundance of moisture, prolific seed corn and such cultivation as will permit the corn to yield its best.

Unless the soil is fertile some extra nitrogen will be needed in addition to the regular fertilizer. Good cultivation also shows up well when rainfall is light. Deep cultivation is not advised by Mr. Hudson after the corn begins to grow well.

The turn plow is effective for breaking land but a poor tool for cultivation. Follow the good practice of giving a frequent, shallow cultivation to keep down weeds and retain the soil moisture, he advises.

Many farmers are now using a good improved, prolific seed corn but too many continue to plant any old seed that may be on hand. This is poor economy, says Mr. Hudson. The good farmer must have good seed. He doesn't want to throw away his labor on poor yields.

It is proposed to permit American women who marry foreigners to retain their citizenship. But it is doubtful if any law will enable them to retain their money.

Feeling Thrifty?..

HERE'S YOUR TIRE!

You'll be surprised at its Low Price ... Amazed at its Performance

WANT to cut car costs? Who doesn't, on occasions! We know how it is... so does Goodrich. That's why, working together, we've got something special to offer you right now.

Goodrich, you see, realizes that all of us like a bargain now and then. But they can't see why a bargain tire can't be a good tire.

So their engineers got together awhile back. Set out to build an outstanding tire at a sensationally low price. A tire that could carry the name Goodrich. A tire that would live up to Goodrich standards on the road.

Result... the Cavalier. Big and husky. Oversize in air cushion. Thicker and tougher in tread. Built to fight off rough roads and high speeds and take its own time about wearing out.

Built to sell at prices that beat even ordinary tires for real savings.

We've got a full stock of Cavaliers on hand right now. All sizes... including a couple for trucks. And as our contribution to this money-saving party, we're offering them at special prices. Cutting the figures even lower than they usually are.

Come in... see what we've got... and you'll walk out with a nice saving in your pocket!
