

Piedmont Springs.

(From the Stokes Record.) Long before Moore's or Vaid Mecum were known as a watering place Piedmont Springs was famous. For over a hundred years Piedmont has been famed as a resort of health and pleasure. People came from far and near to drink of the justly famous mineral water.

The lives of many people were lengthened and even saved by this water and by the rest at the springs. It was the fashion to go to the "Springs." Before the age of the automobile people did not go for hundreds of miles for a vacation and the average person's idea of a vacation was to stay at Piedmont. Invalids and aged people went to drink the helpful tonic water and enjoy the peaceful rest in the beautiful country. Many games were enjoyed by the guests, tennis and other lawn bridges and another. Dancing was much enjoyed by the young as there was always a fine band.

Young people also looked forward to meeting those of the opposite sex. There was much love making and of course some match making. A few years ago a beautiful swimming pool was added to the attraction.

Crazy Crystal mineral waters are widely advertised and probably used at the time. No doubt, Piedmont waters are equally as beneficial as these.

An analysis of the water at Piedmont is one gallon. It contains:

- Iron, Aluminum Oxide...79 grs. Silica...1.18 grs. Sulphate of Potash...81 grs. Chloride of Soda...1.51 grs. Sulphate of Soda...38 grs. Carbonate of Soda...34 grs. Carbonate of Magnesia 2.11 grs. Carbonate of Lime...3.26 grs.

The food at Piedmont consisted of fried chicken, hot rolls, fried apples, and country ham and the marvelous appetites to enjoy them. Galax leaves were usually on the table which gave the room a mountain atmosphere which blended with the appetites created by the healthful mountain air.

Among the charming people who frequented Piedmont every summer were the McMillans, Trotters, Smiths, Galloways, Joneses, Conells, Pouchers, Allens, Frackers, Holtons, Buxtons, Sheltons, Ludlows, McInnes, Ivins, Pringers, Stacks, Fields, Peppers, Blackburns, Taylors, Daltons, Finchams, Vauhans, and numerous others.

Hog Killings.

Danbury Route 1, March 13.—The depression is ending with wood choppings and hog killings. W. V. Bennett killed a nice porker some time ago, weighing around 85 pounds.

Rufus Mabe gave his neighbors a treat the other day. He killed a 60-pound porker and called his neighbors in to a wood chopping and gave them hog's head and cabbage, but some of the boys ate too much and made themselves a lee bit sick.

John Ed Mabe has killed the costliest hog that's ever been known, this hog has cost John Ed two dollars a pound. He kept it four years and it just weighed 84 pounds. It had spurs like a rooster, roosted on a pole, and had horns like a goat, and they had to cook the back bone and spare ribs a half a day before they could stick a fork in the gravy.

King News.

King, March 14.—The Woman's Auxiliary of the Moravian church held their March meeting with Mrs. Clady Newsom on West Main street. Mrs. J. E. Stone conducted the devotional. The reading of the minutes and roll call was by Mrs. Clady Newsom. The offering was gathered by Mrs. Anne Grabs. The program was in charge of Mrs. R. C. Meadows. Mrs. Astby White conducted the Bible study the third chapter of Acts being used. Twelve members answered to the roll call. The next meeting will be held with Mrs. Elmer M. Hauser. Mrs. Newsom assisted by her daughter, Miss Thelma Newsom served a delicious salad course.

Ollie Pulliam, of Winston-Salem, spent Sunday here the guest of his mother, Mrs. B. F. Pulliam. A large number of citizens went to work last week on the new addition to the high school building. It is now under way and will be completed in about two months.

Mr. and Mrs. Grady came to town on Saturday. They were in town to see the games at the stadium.

ORANGE TOBACCO FERTILIZER WINS AGAIN in competitive tests!

Only Public Tests of Fertilizers Ever Put On by a Manufacturer Again Prove that Orange Will Outgrow, Outqualify, Outproduce and Outdo Any Other Tobacco Goods Known

Once again Orange Tobacco Fertilizer has demonstrated the truth of our claims for it—that it will consistently outgrow, outproduce, outqualify, and outdo in every way any other tobacco fertilizer known to tobacco growers anywhere. The series of tests of tobacco fertilizer just completed by highly reputable farmers proves it. But there is further proof. The tests made in 1932 proved it. The small number of claims on the Orange guarantee proved it—the experience of thousands and thousands of growers proves it also.

The guarantee of the refund of the premium on Orange is withdrawn by us this year in compliance with the N.R.A. Fertilizer Code—otherwise, we would continue it.

Regardless of that, Orange will be the best and most profitable tobacco fertilizer for you to use. It will produce more leaf and better leaf. It will bring you a better return per acre than any other goods you can use.

The tests shown herewith are the only ones ever made by a fertilizer company on which the results have been made public. To our knowledge, S-D is the only fertilizer manufacturer who, year in and year out, continues to spend its own money on tests—so that its grower friends can see the facts behind the claims made for S-D goods.

The average of the 1933 tests showed that Orange produced \$51.71 per acre more! That it was worth an average of over \$100 per ton here!

Why They Stayed Home Mrs. Jones—Why do you all stay in the house so much Mrs. Brown? Mrs. Brown—I'll tell you, Mrs. Jones: We pay an enormously high rent for this house and want to stay in it enough to get our money's worth, you see. You can continue to respect your friends if you will learn to say "no" when they need money.
