Old Age Pension Measure Is Forecast By Robinson

Washington, Jan. 8. — An economic security program costing a hundred million dollars the first year and covering unemployment insurance and old age and widow pensions was forecast today by Senator Robinson, of Arkansas, the Democratic leader.

Robinson said he expected the whole subject to be covered in one bill and that presidential recommendations would be sent up with a special message late this week.

The word came from Robinson at about the same time that Senator Capper, Republican, Kansas, introduced a bill designed to give persons over 60 an income of \$360 a year. He said this sum would be enough to keep them out of poorhouses but not enough to print them to surrender jobs to depend on this income.

"Saving" Money By Consolidation

Mrs. O'Berry, state administrator, says she can save \$180,000 by consolidation of offices. We hope she can, but a man in authority estimates the increase cost at \$200,000. We shall see what we shall see. — Cleveland Star

The widespread sentiment for protecting small growers in the crop programs is summed up in resolutions adopted recently by the Orange County Board of Agriculture.

A copy of the resolutions was sent to the Washington office of the AAA by W. A. Davis, secretary of the board, suggesting the following policies for 1935, reports Don Matheson, county agent of the State College Extension Service.

That small farmers living on their own land and dependent upon its products for support who have raised tobacco within the past five years be given a tax free allotment equal to their largest base year, provided the allotment does not exceed three acres.

That no rental or parity payments be given these farmers, and that small growers who have already signed contracts be allowed to come under the provisions of this ruling.

That small cotton growers living on their own land who have raised cotton within the past seven years be given a tax free allotment equal to their largest base year, but not in excess of two bales.

Such policies, the board pointed out, would encourage farm and home ownership by providing more liberal allotments to tenants and young farmers who wish to buy small farms.

Tenancy and absentee ownership would be discouraged, it was pointed out, and the price of farm land would be stimulated, while farm wealth would become more equitably distributed. Country-minded people in the cities would be encouraged to move back to farms.

Production would be on a more economical basis and small farmers who have diversified their farming would not be penalized with unfairly small allotments, it was brought out.

The rights of the small man would be upheld and the burden of the cotton and tobacco tax on excess sales would not fall on the small growers, the board continued, and the future of the AAA would become more secure because there would be more satisfied farmers.

WHEN a man buys an automobile, he doesn't buy just any old brand—he buys the kind that has made a record for itself by performance!

And that's the way you ought to buy your plant bed goods—and it is exactly why you should buy BLUE RIBBON GUANO for your Tobacco Beds!

BLUE RIBBON was introduced three years ago—and it has made good every year!

It makes good because it is the perfect plant bed formula! It is loaded heavily with soft, quickly soluble, soil-warming, bacteria-producing organics. It has a higher nitrogen content than ordinary plant-bed goods. And, to prevent chlorine injury, it is guaranteed to contain less than 1% chlorine.

Ask your neighbor what he thinks of BLUE RIBBON. Then, if you want plenty of fine plants, and want them ten days to two weeks earlier—if you want healthy, disease-resisting plants that will hold on and grow right out of blue mold if they are stricken—if you want the basis of a fine, top-money tobacco crop—
