## Doctors Know!

... and they use liquid laxatives

You'd use a liquid, too, if you knew how much better it makes you feel. A liquid laxative can always be taken in the right amount. You can gradually reduce the dose. Reduced dosage is the secret of real and safe relief from constipation. Just ask your own doctor about this. Ask your druggist how popular liquid laxatives have become. The right liquid laxative gives the right kind of help—and the right amount of help. When the dose is repeated, instead of more each time, you take less. Until the bowels are moving regularly and thoroughly without aid. People who have experienced this comfort, never return to any form of help that can't be regulated! The liquid laxative generally used is Dr. Caldwell's Syrup Pepsin. It contains senna and cascara, and these are natural laxatives that form no habit. It relieves a condition of biliousness or sluggishness without upset. To relieve your occasional upsets safely and comfortably, try Syrup Pepsin. The druggist has it.
