The Supreme Court vs. The Farmers.

The vital question that concerns this section of North Carolina is—what has the Supreme Court done for the farmer?

The answer is plain—it has STRANGLED the farmer.

The AAA was the greatest god-send to the farmer in the history of the nation.

But the Supreme Court invalidated the AAA by declaring it UNCONSTITUTIONAL.

Was the Supreme Court unanimous in its decision against the farmers under the AAA?

It was not. At least THREE members declared the AAA WAS constitutional.

Does the Supreme Court have the power under the constitution to declare ANY law unconstitutional?

It HAS NOT.

Has the Supreme Court superior powers to congress and the President under the constitution?

It has not.

Is the President within his rights to request congress to exercise its constitutional right in naming additional members of the Supreme Court?

He certainly is.

Then why do not the masses of the tobacco farmers of North Carolina back up the President in his demand for NEW BLOOD on the Supreme Court?

Echo answers—WHY?

A Courageous Congressman

With a consistency that is beyond challenge, Congressman Frank Hancock has stood with the President on every vital recovery and reform issue.

The attitude of Mr. Hancock by no means indicates that he is a rubber stamp. Those who know him know that he has a mind of his own, which, by the way, is one of the keenest in the present Congress.

What it does mean is that the Hancock philosophy is essentially the same as the Roosevelt philosophy. The representative from this district is keenly aware of the inequities which are inherent in the economic life of the nation and the malevolent influences in government which perpetuate them.

The people have in Mr. Hancock an able and loyal champion, who is also a true exponent of Jeffersonian democracy. That he acknowledges no master save his own conscience and the will of the voters in the fifth district is again demonstrated in his support of the President on the court reform issue, upon which he has spoken courageously in favor of the President's plan.

degree as the courts." Again Justice Holmes said: "The first requirement of sound body of law is that it should correspond with the actual feelings and demands of the community.

"The courts were intended to endure for all ages to come and consequently to be adapted to the various crises in human affairs."

These quotations from great students of our government deserve study and thought as our people stand at the crossroads of national affairs. These statements were not made in the heat of debate. They were made by men who enjoyed national confidence, and by men whose deeds merit that their words be remembered. I cite them now because they are timely.

Is the President correct in his contention that the Supreme court has not given due respect to the legislative will of the people? Are the opponents of his program correct in their contention that the Supreme Court has always been right? Answers to these questions will be found when the people on farm and in factory understand clearly the issues involved and thunder out their views. They, and they alone, must answer. Their rights must come first. And the effort to put these rights first precipitated the present momentous issue.

Paving Highway 52 Completed July 1

Paving work on the new link of the United States highway 52 from Pilot Mountain to the Forsyth line, a section that covers a major part of the route from Mount Airy to Winston-Salem, will begin early in March, accord-

ing to a statement published in the state press this week by J. A. Hughes, resident engineer on the project.

The grading work on the twelve mile link of this important highway was begun last summer and has been completed for some time, although weather conditions this winter have been such as to prevent any work in recent weeks.

However, the roadbed has been allowed to settle into shape for paving, which may start as early as March 1st.

Mr. Hughes, in his statement to the state papers, give March 8th as the opening date for the paving work named July 1st as the date when the road will be ready for use again. However, he qualified his announcement by stating that the paving will begin at that time if the weather conditions permit.

The contractors estimate they can pave about one mile per week. Which would give a completion date the last of May. However, July 1 is given as the probable completion date when possible weather interference is considered. It is expected that the paving

will be started near King, leaving the upper end to be paved last.

The new link of highway leaves the present concrete road at the lower end of Pilot Mountain and follows the eastern side of the Atlantic and Yadkin railroad for approximately twelve miles to the Stokes-Forsyth line at Muddy Creek. Traffic has been detoured to Winston-Salem by way of westfield while the link of road has been under construction.
