The Ruses Of Modern Politics.

McReynolds of the Supreme Court—what is he, Democrat or Republican?

He was appointed by Woodrow Wilson a Democrat. That's true. He was appointed by Theodore Roosevelt as a Republican. That's also true.

Comfortably ensconced on the supreme bench at a salary of \$20,000 for life, his Honor finds it convenient and agreeably with his complexes to vote the Republican ticket, which he does, and did in the late election. He was a strong partisan of Landon and a bitter foe of President Roosevelt.

Was it because of the Judge's corporation background, or his Liberty League affiliations, or just a plain enmity toward Roosevelt?

We do not pretend to know, gracious goodness.

But we do know that whereas the irascible and Roman-nosed Tennessean was taken for a Democrat once, he is not now, but is well known as the bitterest man in Washington against the New Deal and consistently tries to thwart its every move.

What is he then? A Democrat or Republican?

This explanation is largely for the information of the Union Republican, which is worried because the record unmistakably shows that the Supreme Court in its palpable enmity to the country's recovery under the New Deal stands: Three Democrats and six Republicans.

And that's that.

And now as to the fellow who writes the Union Republican's political paragraphs and who has made several personal references to this paper recently:

One might get exasperated at him if he did not afford so much amusement to the country. He has never found out that the Democrats carried the country, and every time a Democrat is appointed to office or a relief worker gets a job, he throws a fit.

He evidently believes the appointees should be Republicans, and has never heard of the psychology left behind by Andrew Jackson, and assiduously carried out by both parties, that to the victors belong the spoils.

Naturally everybody hates to be lied about and slandered, but strange to say nobody takes this slanderer seriously. Wonder why?

In Winston-Salem it is well known, though soft pedaled, that the Forsyth county political organization now in power would sooner part with its absentee ballots than its Union Republican, and that during campaigns hundreds of copies of the muck-sheet are mailed to disgruntled or apathetic Democrats.

Thus the Forsyth majorities grow larger.

Voters learn by antithesis. Politicians are smart guys.

It used to be the fashion to dip scurrilous blatherskites in duck ponds. But the modern plan is to stand by and laugh.

RICH FISH SCRAP

POTASH

PACKING HOUSE PRODUCTS

ROBERTSON'S Tobacco FERTILIZERS CONTAIN 10 INGREDIENTS

Use these non-acid forming fertilizers if you want to grow more of the higher-priced grades of tobacco. The nitrogen is in many forms derived from rich fish scrap, packing-house products and nitrate mines. The potash is supplied in three different forms—Sulphate of Potash, Muriate of Potash to give body and weight, and Sulphate of Potash Magnesia to prevent frog-eye and sand-drown. These ingredients supply all the usual elements plus many extra needed minerals. Into every bag goes large quantities of magnesia. They are non-acid forming, cannot sour your soil.

Robertson's Tobacco Mixtures contain half organic nitrogen and half mineral nitrogen (proven best by test).

Gentlemen:  
I have been enusing your GOLD DOLLAR for the past 3 years, and have made a good crop every year. Last year I used 17 1-2 bags on a little less than 4 acres and made 4756 pounds and which brought \$1450.00.

I am satisfied there is no better fertilizer made than ROBERTSON'S.  
Yours very truly,

makes him more susceptible to disease than when he was a baby. We are stressing the special precautions that intelligent parents should take to protect their children from unnecessary illness. "Just colds"—the ordinary sneezing, coughing, variety should be avoided as much as possible, if for no reason than that they lower a child's power to resist diseases. Tonsils often become diseased and stick out into the throat. Sometimes diseased tonsils do not get any larger but contain little cups filled with pus. Diseased tonsils hold poisonous germs which may cause throat trouble (tonsillitis) or may be carried to other parts of the body and cause other serious illness. Every child should have a health examination every six months, made by the family physician; this will usually detect diseases and defects before the child starts to school. No parent should neglect the health of a child who seems slow in development. The runabout stage is the time to correct this condition. The determining years of a little child's life are from 1 to 6. Therefore, we insist that you come and cordially invite all of you to the Pre-school clinic.
