From where I sit...

"Well," says Judge Cunningham. "I see they've got it!"  
"Got what?" I says.  
"Look," beams the Judge. And he pulls out an article about a special kind of lie detector—an "alcoholometer" they call it.  
When a fellow gets haled into court for doing mischief, and blames it all on a "couple of beers," this scientific machine proves whether just a "couple of beers" is really the true answer.  
And o' course it isn't. Because a couple of beers, enjoyed with friends, is a way people keep out of trouble, not get into it!  
From where I sit, I certainly agree with the Judge. The fellow with the alibi about a "couple of beers" is reflecting on good citizens everywhere who enjoy a quiet glass of beer with their meals—sittin' with their friends or just relaxing after a day's work. Moderate folks like that are entitled to consideration.
