about the AAA and other  
**EXTENSION WORK**  
From the  
**County Agent**

By E. S. STOKES, County Agent  
and R. C. WHITAKER, Asst. Agt.

On Tuesday, October 12, at 12 o'clock noon, there will be a purebred Guernsey sale at Elkin. The following animals will be sold: 6 cows, 21 heifers and five young bulls.

Animals carry the blood of the following outstanding bulls: High Point Prince Maxim, Argilla Knight, Valor's Yeoman, Foremost Gay Lad, and others.

This sale is sponsored by the Elkin Civic Organizations, North Carolina Extension Service, North Carolina Guernsey Breeders Association, American Guernsey Cattle Club.

If anyone is interested in attending the sale please contact the County Agent's office and arrangements will be made for going to the sale.

### PLANT MORE THIS FALL

Your attention is again called to our feed shortage. Farmers of Stokes county must do their best to plant a record feed crop if we are to keep the livestock and poultry we now have. Just to prove this point we only need to think of the 9,000 bushels of wheat that has been sold to farmers by the Monitor Roller Mills of Walnut Cove. Their wheat supply is now exhausted and the supply at King will soon be used up. What are you going to do about your feed problem? It is coming home to every one of us. Are you prepared for a feed shortage? Let each person ask himself this question. Then if you have more poultry and livestock than you have feed, what are you going to do about it?

Many farmers are getting the land in shape for the seeding of small grain and winter legumes. A winter grazing crop for hogs, cattle and poultry will reduce the mash and grain costs. The AAA office at Danbury still has a large supply of Crimson Clover, Austrian winter peas and vetch. They can be secured from the AAA office at no cost to the farmer. This is a chance for you to grow feed to help our soldiers fight. It is best to sow these crops oats, rye, wheat or barley. A mixture of any or all of these crops makes good grazing or can be mowed and made into hay.

If you were a soldier fighting in Italy would you like to know that we have a feed shortage? No, none of us would. Alright then think of your boy over there and plant more feed crops so that he can eat. We cannot feed the livestock that furnishes the soldiers on the battlefield food unless we grow more feed crops this year. For their sake plant more this year.

### INFORMATION ON INCOME TAX

We take up this week the Exact Computation method of comput-

ing the Estimated Income and Victory Tax. As has been said before the use of this method will probably result in a saving to the majority of the taxpayers of Stokes county. A worksheet to be used in this method is also provided by the Department of Revenue, known as Alternative Instructions for Declaration of Estimated Income and Victory Tax by Individuals (Form 1040-ES).

#### The Work Sheet

The first and fourth pages of this form are given over to instructions, general and specific which every taxpayer should read before undertaking to make up his work sheet and return.

#### Page Two

The second page is given over to a listing of the estimated incomes from various sources, and the estimated deductions. These items are somewhat similar to the listing of the items in the old income tax returns filed last March. On the right side of page two there appear two columns in the first of which is listed the amounts of each relative to the estimated income tax, and in the second of which are listed the amount of each items relative to the estimated victory tax. Each of the items listed on this page will be taken up separately in our future columns dealing with the tax problems, for it is in these items that the taxpayer effects his saving. The last two lines on page two give the estimated income tax net income and the estimated victory tax net income respectively.

#### Page Three

The computation of the taxes, the computation of the estimated withholdings and payments and the transfer to the return itself are easily accomplished by following the printed instructions and by use of the figures arrived at on page two. Each of these steps including the Estimated Post War Credit Currently Used will be dealt with more in detail in future columns on this subject.

W. W. Smith of Lawsonville was here today on his way to market with a load of commodity that makes the more go. Weldon is one of the county's most prosperous citizens and successful farmers.

It was one of mother's busiest days. Her small son, who had been playing outside, came in with his pants torn.

"You go right in, remove your pants and mend them yourself," his mother ordered.

Some time later she went to see how he was getting on. The torn pants were lying on a chair. The door to the cellar, usually closed, was open and she called down, loudly and sternly, "Are you running around down there without your pants on?"

A deep voice answered, "No, madam, I'm reading the gas meter."

### Ever think about Running a Factory?

If you've ever run a farm or dairy or store, there are a lot of things about running a factory that you'd find pretty familiar. Things like working any and all hours, training green help, planning for months ahead without letting the planning interfere with the job of the moment.

These are the responsibilities of management. And the peculiar American ability to meet and lick these problems means a lot today, both on the food-producing and weapon-producing fronts.

Ability to manage isn't picked up overnight. For good management is a skill just as much as good workmanship—learned the hard way.

It won't be forgotten overnight, either. For it is these men who, on farm and in factory, have actually produced the things from which our high living standard is derived, who can and will, by working together, give every American a more abundant life in the peacetime years to come. *General Electric Company, Schenectady, N. Y.*

BUY WAR BONDS

## GENERAL ELECTRIC

## Let's Don't Waste ELECTRICITY

Anything that costs so little as Electricity is easy to waste. But there's a war to win, and there is no time for waste.

There is still plenty of Electricity to serve your needs in home, office, store and industry. But in an effort to save fuel, transportation, and manpower, the Government is asking you to conserve Electricity. Let's help the war effort by conserving a big war tool.

Deal with purely decorative and non-essential lighting and turn off lights and appliances when not in use.

Electricity is Vital In War—Don't Waste It.

## DUKE POWER CO.

**GOOD TOBACCO FARMS FOR SALE**—One extra fine tobacco farm, consisting of 60 acres, good 5-room house, electric lights, and all modern conveniences; Also one good tobacco farm on Snow Creek near Danbury.
