**SNAPPY FACTS ABOUT RUBBER**

Low costs prevailing, post-war world consumption of natural and synthetic rubber may total 2,000,000 tons a year, is the prediction made recently by John L. Collyer, president of The E. F. Goodrich Co. This would be nearly twice as much as ever consumed in a record year to date.

Some 32 million pounds of rubber will be needed by the Army Signal Corps this year for insulating W-110-B wire used in maintaining direct communications. An additional 4 million pounds will be required for friction and splicing tape. Just two of the many rubber-using items of this Army branch.
