Letter From Pfc. Cox On Isle Of Corsica

On the Island of Corsica

Dear Mother and Dad: Will write you a few lines to say hello.

Well, they have moved us again. They carried us to the Island of Corsica, away above Rome. Have been here about two months now. The weather is really nice. It hasn't rained any here yet.

The night we passed the beach-head in Italy, the Germans were trying to bomb the ship out in the harbor. Boys, the lad went flying up at them, but it wasn't as bad as it was in Sicily July 10.

The water was nice and quiet on the ship. I like it here lots better than I did in Italy. I'm sure you heard about the mountain volcanos over the radio. I was about 3 miles from it when it all happened. It was worth looking at. About 3 months before that, I was all over that mountain.

You were asking about my Italian friend. Well, he is still with me yet. He works in the kitchen in my place so I can rest. He came with us over here from Italy. His home is up at Rome. That's why he is staying with us, so when we take Rome he can go home and see his family.

There were right many oranges in Italy, but I haven't seen any since I've been here. And by the way, I haven't seen a banana since I left the States. But after all, the Red Cross is doing their part. They are always bringing us hot cocoa. The Red Cross is really good to you when you are with the army. There is a Red Cross building near where I am.

I think the 47th Fighter Group is here in Corsten. I believe they are the Night Fighter Group. The last field was the 345 Bomber Group, which was down at Salerno.

Well, mother, I have seen Gen. Patton in North Africa and Gen. Clark in Italy. I saw Ernie Pyle, too. I would liked to have talked with him.

Everything is really high over here. Eggs are \$8.00 a dozen. Will close for this time. Love to all.

Your son, Paul.

Pfc. Paul D. Cox 31430507. Bat. B, 490 (AAA) A. W. Bn. APO 512, c/o Postmaster, New York, N. Y.

OUR BOYS

Mrs. N. F. King, Walnut Cove, Route 1, says her boy, John Edward King, has notified her he is now in the Admiralty Islands, Pacific ocean.

Husband: "If a man steals, no matter what, he'll live to regret it."

Wife (cooly): "You used to steal kisses from me before we were married."

Husband: "Well, you heard what I said."

Function of the Light Carriers—Danbury Boy On the Cabot

Washington.—The navy disclosed today that nine light aircraft carriers, built on cruiser hulls, have taken over a big and important tactical role in the war against Japan—protection for big carrier task forces.

"They have a deadly sting," reported the navy in revealing for the first time some of the duties to which the U. S. S. Independence, Princeton, Belleau Woods, Cowpens, Monterey, Cabot, Langford Blyden and San Jacinto have been assigned.

"Airmen from a light carrier," the navy continued, "join up with the larger air group from a big carrier to add a greater pinch in a strike upon enemy shipping or islands."

"Or the light carrier's pilots assume the vital job of protecting the task force against enemy attack, thus freeing the large carriers entirely to concentrate upon the mission of assault."

"Some of the interceptions accomplished by protective planes from the light carriers have been spectacular; entire formations of attacking Jap bombers have been shot down before they could even get within sight of the fleet." The "Sun Setters"—officers and men of Navy Air Group 23, operating from one of the ships, the navy said, "helped establish the worth of the light carrier in the fleet."

When they sailed into the Pacific last year, the place and function of the light carriers were unknown. Now the "Sun Setters" are back in the United States, their worth and the worth of the light carriers proved at Malakal and Tarawa; in the Solomons; at Rabaul, teamed with the big carriers Saratoga; in the Gilberts, in the Marshall Islands; in the Carolines and off Hollandia.

En route home they struck at Truk, one-time feared base in the Caroline group, participating, the navy says, "in the great damage done to the installations of the shattered Jap stronghold."

It took eight months for the "Sun Setters" to complete their assignment, and to complete the record of usefulness of the light carriers. In that time they destroyed or damaged 81 Japanese planes, sank or damaged 38 enemy ships and caused incalculable damage to enemy shore installations.

Paris Peffer, S. C. son of the editor of the Reporter, is a gunner on the carrier Cabot, mentioned above.

Jeans: "Here's that last pair of trousers you made for me. I want them re-seamed. You know, I sit a lot."

Tailor: "Yes, and I hope you've brought the bill to be receipted. You know I've stood a lot."

"Why are you suddenly taking French lessons?"

"Well, we've adopted a French baby and we're eager to know what he says when he begins to talk."
