**Don't Waste Electricity**

Electricity itself cannot be saved or stored away. But any reduction you can safely make in your use of it, will cut the amount of fuel burned to make it. That will mean fewer freight cars to haul it and fewer man hours to handle it.

Each little bit that you save, multiplied by thousands, will be a contribution to the Voluntary Conservation Program being sponsored by the Government.

"There is no shortage of electric power . . . and there will be none . . . for war and essential civilian requirements."
