IDEALS OF MASONRY. REV. MARK MOSES' LECTURE AT THE HEBREW TEMPLE BY INVITATION OF THE MASONIC LODGE OF THIS CITY.

Last Friday evening the Hebrew Temple was filled by a large and intelligent audience, to listen to Rev. Mark Moses' brilliant lecture on the "Ideals of Masonry." He said it was a subject, in which every one was interested, no matter what his religion or what his country may be. All institutions, social moral or political, had their ideals. They existed in every sect and every institution. To the ideals of Masonry he invited the attention of his audience—an institution created by man for his development and his advancement. It was not necessary to enter into a discussion of its history or of its principles. Masonry was independent of social and religious principles. In society however it recognized the relations of human brotherhood; in politics, human rights, in religion, the need of divine assistance. It was these three ideals—social, religious and political, which he proposed to consider. The social ideal of Masonry was substantial, and taught a lesson of brotherly love, unexcelled by all other organizations. The Golden Rule was at the basis of its social ideal. He illustrated the ancient tradition of the social friendship between a monarch of Israel and his master builder, which had been preserved by the symbols of Masonry, and which inspired one hope, one faith, one principle. The importance of a brother's welfare was constantly impressed upon the Masonic order. This was the first point where it touched our daily life. The second reached higher. Above man was the great I AM. A brother's welfare was followed by the adoration of a heavenly being. There could be no holier bonds of friendship than this, no grander ideal. This was one of the grand social ideals of masonry. A third was to guard the honor and reputation of a brother's name and a brother's character, an ideal which the speaker elaborated, remarking that this ideal did not, and should not, shield a man from just punishment from crime or the transgressions of law. Another point in the social ideal was the advice guaranteed by truest friendship. The religious ideal was next considered by the lecturer. Masonry did not ask a man in what nation; it recognizes all as brothers. It did not ask a man what his religion; it did not care for his religion, for it recognized God. The basis of Masonry was a recognition of the divine Creator, and the love of your neighbor as yourself. The bearing of Masonry upon political life was then considered. Questions of party politics never entered into Masonry, but Masons recognized human rights, and human welfare. The watchword of Masonic life was light. This was the call of soul. It was one of the commands of the Creator. "Let there be light." The lecture, which only occupied thirty-five minutes in its delivery, was well received, and claimed the closest attention of the audience. It was both able and eloquent, and was delivered in a very effective manner. The lecture will add greatly to the reverend gentleman's reputation as a scholar and an orator, as well as a brilliant and entertaining lecturer.

The subjects of Tariff and Internal Revenue are engaging the consideration of Congress, Press and People. Just what the outcome of this agitation will be cannot be foretold. But if those familiar with the prices of Wall Paper twelve months ago will call at Whitaker's Bookstore, under the Opera House, and learn the present prices, they will find reason to conclude that some kind of Tariff upon these articles has been reduced, or abolished. Now is the time to buy. Prices are likely to advance. Large stock from which to select and new patterns recently received. Call and see.
