THOUGHTLESS MAN.

She was very rich, but slightly passe, and he was poor.
"You are so beautiful," he whispered as they sat out in the lambent light of the harvest moon, and the languorous music of the orchestra in the distant ball room was wafted to them, sweet and low, on the evening air.
She did not take her hand away as she felt the warm pressure of his upon it.
"But beauty fades," she sighed regretfully, and there was a touch of bitterness in her tones.
"Yes," he said abstractedly, "I had noticed that."
She snatched her hand from his and with a scornful look froze him to the spot, so that the iceman picked him up with his tongs in the morning and delivered him at the kitchen door.—*Detroit Free Press.*

AN AMUSING FABLE.

Traveling through the sagebrush country a Jackass met a Rabbit who exclaimed in great astonishment.
"Good gracious! how did you grow so big? You are doubtless the largest rabbit living."
"No," said the Jackass, "you are the smallest donkey."
After a good deal of fruitless argument the question was referred for decision to a passing Coyote, who was a bit of a demagogue and leisured to stand well with both.
"Gentlemen," said he, "you are both right, as was to have been expected by persons so gifted with appliances for receiving instruction from the wise. You, sir"—turning to the superior animal—"are, as he has acutely observed, a rabbit. And you"—to the rabbit—"are correctly described as a jackass. In transposing your names man has acted with incredible folly."
They were so pleased with the decision that they declared the Coyote their candidate for the Grizzly Bearship; but whether he ever obtained the office history does not relate.—*San Francisco Examiner.*

SCIENTIFIC AND INDUSTRIAL.

A pneumatic shoe sole is new. Sydney, New South Wales, has a 12,000,000 electric light.

A company has been organized at Grand Rapids, Mich., for the manufacture of paper matches.

Many metals, such as gold, silver and platinum, are now caused to volatilize by means of the electric current.

Concentric wiring for electric work is rapidly gaining ground, it being regarded as safer for lighting purposes than the two wire system.

The new system of transmitting power by means of compressed air, which was recently tried in Olean, N. Y., showed a loss of but thirteen per cent. in the daily output.

The recent losses by fire in the cargo of ships carrying cotton has shown that cottonseed oil, when held in the cotton on the outside of the ball, rapidly oxidizes and generates spontaneous combustion.

A disinfectant which combines cheapness with general worth is found in permanganate of potash. One ounce will make a bucketful of disinfectant. It is a crystal and can be kept in this state until ready for use.

The Cambria Navigation Company, of Wales, has recently built for one of its coal pits a ventilating fan which is claimed to be the largest ever constructed. Under favorable conditions the fan will deliver 500,000 cubic feet of air per minute.

As an antidote for a consumptive tendency cream acts like a charm, to be used instead of cod-liver oil. Also aged people, invalids, and those who have feeble digestion or suffering from dullness as well as growing children, will be greatly benefited by taking sweet cream in liberal quantities.

An ingot of nickel steel weighing more than twenty-five tons has been cast in the Homestead Steel Works, and it is to be rolled into a single armor plate for the United States monitor Montezum. It is the largest of the nickel steel ingots yet cast in the mill, but an effort is to be made to cast an ingot to weigh more than fifty tons.

France is fortunate in possessing 1102 mineral springs, of which 1027 are turned to account, and Algeria has forty-seven in use. Of the total in France 319 are sulphurous, like that of Amelie-les-Bains; 354 are alkaline, such as Vichy; 135 are ferruginous, for instance Orezza, and 219 are of various sorts, some containing common salt, others sulphate of sodium, and a third group sulphate of lime.

A California physician has invented an attachment for gas burners to stop the flow of gas automatically when the gas is blown out. The device accomplishes its purpose by means of the expansion and contraction of a liquid in a hermetically sealed receptacle, so that when the gas is extinguished the contraction of the liquid operates levers which control a safety valve, thus closing and shutting off the gas.

The Prussian Government has made a report upon its buildings struck by lightning between 1877 and 1886. There were 53,502 buildings used for official purposes in Prussia; 254 of these were struck, or one-half of one per cent. per thousand annually. Of the total number, fifteen only were fitted with conductors, and only one of these escaped injury. Generally the conductors were found to be either dangerous or useless. In six they were not touched.

A veritable curiosity has been captured in Africa. It is an elephant larger than the late lamented Jumbo, pea-green in color, trunkless, and has tusks that branch out something like the horns of a deer. It is in possession of a native king, who will not part with it.

The actual length of the new St. Clair Tunnel is 6026 feet. It cost \$1,460,000.

SELLING OUT!!

MY ENTIRE BUSINESS!

This is not to mislead you in order to get you into my store, and then mean something else, as it is often done by parties who have overstocked themselves, but in my case

IT IS THE WHOLE TRUTH!!

AND NOTHING BUT THE TRUTH.

Although I have been in this city for several years, where by hard toil and fair and square dealings towards all, I have built up a very good trade that extends throughout this and adjoining counties, circumstances compel me to leave this city immediately after Christmas. In order to accomplish this, I shall throw this day

MY ENTIRE STOCK

ON THE

MARKET.

It consists of new and reliable goods in the line of

DRY GOODS, CLOTHING,

BOOTS, SHOES, HATS, TRUNKS, etc.

I have a tremendous stock on hand, and as I do not intend to carry a single article with me I decided

NOT TO REFUSE

ANY REASONABLE OFFER.

I will allow any customer to learn my private mark, and, furthermore, the original bill will be handed for inspection, if desired.

THE GOODS MUST BE SOLD!

The Shelves Must be Emptied!

THE MONEY MUST COME!!

When you come to my Store, examine the handsome line of

ever known in this section. You may go to all the stores in this city—those especially that are claiming "not to be undersold"—and get their prices, and then come to my establishment where you will soon find out that you saved at least 50 per cent. on all your purchases.

My Entire Real Estate,

consisting of STOREHOUSE, on East Centre Street, and DWELLING HOUSE, corner of John and Mulberry Streets, will be sold, to those meaning business, at very reasonable terms. The Storehouse was recently erected, and as it will be generally conceded is the finest business building and best stand in Goldsboro.
