DEATH IN THE QUICKSAND.

Hunter's Effort to Secure a Brace of Ducks Costs Him His Life. Charles A, Lindberg, 40 years old, undergo woman's severest trial foreman of James J. Hill's farm near White Bear, met with a terrible death yesterday afternoon. About 1 o'clock he left home, telling his wife he was going to Mud lake on the western boundary
of the farm to shoot ducks.

Two hours later one of the farmhands,
passing along the edge of the lake, heard

of both mother and child, as thousands who have used it testify.

passing along the edge of the lake, heard the faint halloo of some one out on the water. Peering across the lake he saw near the middle of the short of near the middle of the sheet of water an overturned boat and could dimly discern the outlines of a human being strug-gling in the water. There was no boat near in which the farmhand could go to the assistance of the drowning man, and he hurried off to Mr. Hill's residence and spread the alarm among the other em-ployees. When finally a boat was secured and rowed to the spot where the overturned hunting boat floated on the

On Rainler's Top.

The first party to reach the top of Mount Rainier this year made the trip about five weeks ago. It has been generally thought that it would be impossible to reach the summit this year because of the immense amount of snow that fell last winter. Dr. Joseph Felix, professor of geology in the university at Leipsic, who climbed Rainier three weeks ago, pronounces it far more interesting than any of the mountains of Europe or of Mexico. Mount Ramier has 17 gla-ciers, 3 large volcano craters at its summit and several other craters along its

THE NEW DYNAMITE GUNS.

They Are Being Flaced In Position at San-dy Rook - What They Can Do. New York harbor will shortly be guarded by a battery of dynamite guns now being placed in position at Sandy Hook. These guns, three in number, two 15 inch caliber and one 8 inch, were provided for by the recent congress. Work on the foundations for the gum has been going on for several weeks, and Mr. S. D. A., the resident inspector at the West Point foundry at Cold Springs, where the guns were built, and Captain John Rapieff, the chief engineer of Mr. Schuyler's company. The 15 inch guns will be 50 feet long. They can drop 50 pounds of dynamite nearly four miles away, or 500 pounds for considerably over a mile. As the channel for deep water vessels extends only about a mile from Sandy Hook, warships entering the harbor would be exposed to the heav-iest charges fired by these guns. At all ranges the guns can place 75 per cent of their projectiles within a rectangle 90 feet wide by 300 long, about the target usually presented by a vessel.

The full caliber shell or projectile will weigh 1,000 pounds, the explosive charge weigh 1,000 pounds, the explosive charge weighing 500 pounds. The 15 inch guns, when under firing pressure of 1,000 pounds per square inch, can throw at least 20 of these projectiles, carrying al-together 10,000 pounds of dynamite a distance of one mile in half an hour. The exact range of the 15 inch gun at 85 degrees elevation with the large proctile is 2,400 yards; with the 10 inch subcaliber projectile, weighing 500 pounds, it is 4,400 yards; with the 8 inch angular Premonition of a Man Who Was
