When Mr. Blaine returned to Augusta he showed no signs that his campaigning among the rugged hills of his adopted state in the languid, oppressive heat of this dog day weather had told on him. He seemed to feel all the better for it. Mr. Blaine loves a political fight so well that when he takes a hand he seems to actually grow fat on it. His prominence in the canvass has been its striking feature. The Republicans have averaged some thirty rallies a day during the campaign, and these have been addressed by some of the leading statesmen of the party belonging out of the state. Gen. Logan and Senators Sherman and Evarts accepted invitations to speak, but failed to put in an appearance.

The Democrats have furnished the people with but little music from the stump, their managers depending more upon work than wind. Calvin Frost, of New York, has been their principal speaker. The Prohibitionists have had a large number of speechmakers in the field, their biggest guns being St. John and Gen. Dow, whose shibboleth has been, "Kill the Republican party." There have also been one or two speakers on the stump in the interest of the labor reformers.

The campaign has been to run on national issues principally, as formulated by Mr. Blaine. The only state issues of consequence involved are these concerning legislation in the interest of labor, and singularly enough the opposing parties all seem to show a remarkable unanimity of sentiment in favoring the demands of the working people.

The outlook seems to indicate that the total vote will be the lightest thrown for ten years. The total vote for governor in 1884 was 142,107. Of this vote Frederick Robie, Republican, had 98,318; John B. Redman, Democrat, had 58,503; Hosea B. Eaton, Greenbacker, had 3,017; William T. Eustis, Prohibition, had 1,151, and the rest were scattering votes. The total vote for governor in 1882 was 138,478. Frederick Robie, Republican, receiving 72,481; Harris M. Plaisted, Fusion, 63,921; Solon Chase, Greenback, 1,-324; William T. Eustis, Prohibition, 381; Warren H. Vinton, Independent Republican, 269, and scattering, 102.

It will be seen that the Republican plurality two years ago was nearly 20,006, while four years ago it was 8,500. Impartial observers do not think that the total vote this year will exceed 120,000, and it would not be surprising if it did not reach those figures.

A conservative estimate puts the Bodwell vote at 65,000 and the Edwards vote at 50,000. This would give the election to the Republican candidate by 15,000 plurality on a reduced vote. The Prohibition vote is the unknown quantity and excites the most speculation, for the reason that the Democrats say that if it should come up to the figures that the St. John-Dow men claim it will make such a hole in the Republican party as will throw the governorship into the Democrats' hands. This is on the supposition that the Democrats will poll the strength of the party. The highest estimate made of the Prohibition vote is 12,000. There seems to be no evidence that the Prohibitionists will cast so big a vote or that the increase they will have over their vote of two years ago will be drawn exclu- muscles and cords on the upper part of the sively from the Republicans. They have arm while the extension muscles were remade a hot fight, but the chances are that they will not poll over 3,509 votes, and these will be drawn quite as much from the Democratic as from the Republican party. The prospects are that the Republicans will elect Mr. Bodwell by their average plurality on a decreased vote.

SUNDAY IN CHARLESTON.

A Wind and Rain Storm Cools the Heated City.

CHARLESTON, Sept. 13 .- The situation is generally unchanged. One slight shock occurred at 11 a.m. yesterday, but it was not generally felt. The day was characterized by the holding of open-air services in all the public parks conducted by ministers of the various congregations. Sermons particularly impressive were preached by Dr. W. T. Thompson, of the First Presbyterian church, on the battery; Bishop Howe, of the Episcopal church, and Bishop Northrop, at the Cathedral chapel. The relief committee will continue the distribution of rations until stopped by the central committee. Over 20,-000 rations have been issued daily, and in the opinion of the chairman of the relief committee there is not a single case of destitution unministered to in the city. Contributions continue to flow in. Great progress in reconstruction has been made all along the line, and public feeling is much relieved. The almost unendurable heat was broken by a heavy wind and rain storm, bringing great discomfort to tenters and others who are without sufficient shelter. Many loose bricks were blown from the ruined walls, making the streets dangerous for the few pedestrians seeking shelter. No casualties are reported so far. By 9 o'clock p. m. the sky had cleared and the moon was shining brightly.

SENSATIONAL DEATH SCENE.

A Drug Clerk Takes Morphine Instead of Quinine.

LOUISVILLE, Ky., Sept. 13 .- John Bark, a young drug clerk, has just died under very sensational circumstances. He had been drunk all night and feeling ill after he went to bed said he was gsing to take ten grains of quinine. He took morphine, however, instead of quinine, by mistake, and although physicians labored with him all day he was de clared dead in the evening.

After the body was carried home it was surrounded by his mother and neighbors, when the eyes suddenly opened, there were violent twitchings of the muscles of the face, and the arms perceptibly moved. Instantly the mother threw herself upon her son's body in hysteria, kissing her and attempting to bring him back to life by endearments. A physician was hurriedly summoned and a strong electric current was applied, but young Burk was dead beyond recall. The movements were merely muscular. His devoted mother, however, sat up with the body all night, watching it eagerly for any sign of life.

DETROIT, Sept. 13.-A Singular accident occurred at Hillsdale, Mich. There was one part of Saturday's race, however, which he did not think was a drifting match. That was the long reach in from the buoy to the shore. He was quite confident that the Galatea had outsailed the Mayflower on the wind during the half hour that they were making something like a rate of 12 knots an hour. He admitted that the Galatea was outsailed in the fog on Thursday, but said that was because of the error in judging the weather when they reefed their bowsprit and started under the shortened sail.
