day. It has furnished text and pretext for sermon, speech, and peroration. Am I my brothers keeper yes, no, yes if you are moved and controled by those higher impulses that help make the brotherhood of man, and the fatherhood God. Yes if you are willing to drown self ambition into the sca of sordid unconscious immolation, yes if you are willing to share your brothers burdens, and help him to a higher plane of life, to a better conception of what is here, and the hope for hereafter, no if the little existance you call life begins in a selfish circle around the cradle in which you begin life and ends in an oblong trench at the grave. No if you do not know or care what becomes of the world if you can but walk through life without want, and all ways feel that fortunes most luxorious robes await your call. To realize that you are but one in a great family of brothers, and that the highest and best heart trainning is when

you feel for every pain and are anxious to relieve every sufferer whose wail reaches your ear, in a measure approaches that standard of gentleness of heart, and holliness of life, that makes your brother safe within your keeping.
