#### One Twentieth of One per Cent.

A tew people seem to have confused the proposed additional school tax of five cents on the hundred dollars with a tax of 5 per cent- In fact we believe there is a circular out opposing the bond issue which says something about a five per cent tax. Of course there is a tremendous difference between a tax of five cents on the hundred dollars and a tax of five per cent. Five cents on the hundred dollars is only one twentieth of one per cent. This is the merest trifle. It should deter no one from voting for the bond issue--New Bern Journal.
