NOTICE

North Carolina, Surry county. G. L. Simmons, plaintiff, vs., J. A. Atkins, defendant.

In Superior Court. Notice of summons and warrant of attachment.

The defendant above named will take notice that a summons in above entitled action was issued against said defendant on the 27th day of June 1924 from the office of the Clerk of the Superior Court of Surry County for the recovery of a certain sum of money due by note which summons is returnable on the 18th day of Aug. 1924, at the office of the Clerk of the Superior Court at Dobson, N. C.

The defendant will also take notice that a warrant of attachment was issued by said Clerk on the 27th day of June 1924 against the property of said defendant, which warrant is returnable before the said Clerk at the same time of said summons when and where the defendant is required to appear and answer or demur to the complaint or the relief demanded will be granted.

W. L. Lovell, Clerk Superior Court, Surry County This the 27th day of June, 1924.

This is Different

from all other laxatives and relief for

Defective Elimination Constipation Biliousness

The action of Nature's Remedy (No. 1) Tablets is more natural and thorough. The effects will be a revelation—you will feel so good. Make the test. You will appreciate this difference.

Used For Over Thirty Years

Chips off the Old Block

NO JUMBS—Little Pills The same No. 1—in one-third dose, candy-coated. For children and adults.

Good Health is Very Attractive. Good health, clear skin, attractive color, bright eyes, quick wit, belong to those who keep themselves fit, and free from harmful gassy stomach troubles, torpid liver and costive bowels, with Chamberlain's Tablets. They stimulate the entire intestinal tract to healthy activity and keep it so. 25c.

RECOMMENDED BY HER DOCTOR

Found Strength by Taking Lydia E. Pinkham's Vegetable Compound

Kankakee, Illinois.—"My mother-in-law always took your medicine for weakness, and then in the Change of Life it did her so much good that she induced me to take it for a weakness I had for a year and a half. It has strengthened me and now I have a nice baby boy. I do all my own housework now, and I recommend Lydia E. Pinkham's Vegetable Compound whenever I have the opportunity. I am taking it again for weakness, as my family doctor has recommended it for this purpose."—Mrs. HARRY COULON, 984 N. Harrison Ave., Kankakee, Illinois.

Real Evidence of Merit For the relief of female weakness, pains and backache, nervousness and irregularities, with other troubles common to women, Lydia E. Pinkham's Vegetable Compound is a dependable medicine.

Its worth is thoroughly established by such letters as the above. There are women everywhere who, having received benefit, gladly tell other women about it. For sale by druggists everywhere.

A Real Help to Elderly Persons. Constipation should be carefully avoided by elderly people whose advancing years makes them less able to resist the poisons it pours into the system. Chamberlain's Tablets overcome constipation, give good appetite, sound digestion, an active liver and an easy regular movement without griping or nausea. Small cost, 25c.

KNIFE COULD BE LOST UNDER NAIL.

Massachusetts Man Makes One From Stem of Mother's Earring.

Boston.—A knife so small that it can be lost under the nail of the little finger has been made by Solomon Lorenzo Baxter, a watchmaker of Westbury Village.

Formed from the stem of his mother's earring, the knife is only one-eighth of an inch long, and has seven parts, consisting of two handles, a back spring, three rivets and a blade. Mr. Baxter has fashioned it exactly like his own regulation-size pocket-knife. The microscopic knife opens and shuts easily and its blade is sharp enough to cut.

Mr. Baxter, ever since he was a child, has had for his hobby the making of minute objects. His culminating achievement has been this microscopic knife which he has to carry around in a glass tube. The knife can be seen clinging to the sides of the bottle or on the cork.

In addition to this knife, Mr. Baxter has three others which are quite large knives, but which are only a quarter of an inch larger than the microscopic one. He carries them about in a small wooden bag. They are strung on a gold chain, one knife made of hard rubber with a shining blade of gold, and the other two mother-of-pearl with silver blades.

Other Unique Knives.

The hobby that culminated with the fashioning of the smallest knife in the world, started with the construction of a minute knife made out of a coin for his mother. He followed this one with a knife shaped like a man's leg, the blade fitting into the part corresponding to the thigh. In his early days his only tools were a peg, an awl and a file, and with these he once made a padlock containing 22 rivets, out of six silver quarters of his mother's.

Many people have tried to take a picture of his knives, but they are all too small.

Mr. Baxter, who is almost seventy-one, has had a varied and interesting life. He was born in Burnham, Me., and early in his life went out West, where he says cowboys were "wild and woolly" enough. He had many fascinating tales to tell of those days. About the only thing that he brought back East with him was a gambler's lucky ring. It was a plain gold ring, and the gambler traded it to Baxter for a watch, but the luck did not last and Mr. Baxter finally got rid of it.

Has Other Hobbies.

Besides his interest in knives, Mr. Baxter has two other hobbies, clocks and firearms. He makes small banjo clocks, and has been known to finish one in a day. He has made about 15 of them, and no two are alike. His watches and knives have been shown to travelers from all over the world.

Among his treasures are antique wooden clocks, more than 150 years old. He likes to make over grandfather clocks and to work in wood, especially mahogany. One of his clocks is a French Willard clock that is very valuable.

Among his firearms is a pistol 250 years old, mounted with silver and gold, and an old-fashioned flintlock gun with a pepper box; a gun with a knife attached, and a nameplate in a foreign tongue. One of his fowling pieces, made by a famous firm, has engraved on it a man, a dog, a fountain and roosters, and is very old and valuable. Another of his possessions is a dueling pistol, with the former owner's name on the back.

A cork pistol, used in frontier fighting against the Indians, was given by its owner and user, Doctor Newhall, to Mr. Baxter, a personal friend. An Indian gun, shaped much like a mid-iron used in golf, was given him by his wife's uncle, and it is very old and rare.—Boston Globe.

U. S. Annals Citizenship Granted by Confederacy

New Orleans.—After residing in New Orleans virtually all his life, believing himself to be an American and exercising a citizen's suffrage, William D. Seymour has learned in Federal court that he is a British subject.

Seymour was born in Mexico of British parentage and his father was naturalized by the Confederacy during the Civil war.

The discovery that he was a British subject was made when Seymour attempted to obtain a passport to visit Europe. It was denied by the State department on the ground that he could not prove his American citizenship. At the same time it was held that rights granted by the Confederacy were not legal.

Songs of Nightingales Heard on English Radios

London.—Thousands of persons who had never listened to the notes of a nightingale heard the songs of these shy little birds broadcast from the depths of a Surrey wood late one night. These birds were tempted to sing at the right moment by notes sounded on a cello by a musician seated in the wood, it having been found that they respond to musical tones resembling those with which they habitually begin their songs. A sensitive microphone and amplifier were used to transmit the notes to the London broadcasting station.

PROPYLENE IS LATEST ANESTHETIC DISCOVERED

Can Be Administered Without Injury From Poisonous Property of Gas, Says Savant.

New Orleans, La.—Discovery of a new anesthetic was announced by Dr. John T. Halsey, professor of pharmacology and therapeutics at Tulane university, in a paper read before the Orleans Medical society.

The anesthetic is propylene gas, contained in some natural gas, and which Doctor Halsey and his laboratory assistants, Chapman Reynolds and Harold B. Cook, the three of whom discovered its properties, believe can be manufactured from mineral oils. Doctor Halsey's announcement came after several months of laboratory work by his assistants and himself.

"Propylene is similar to ethylene, the discovery of whose anesthetic properties, announced last year in Chicago, was hailed with enthusiasm by the medical profession, and resulted in its extensive use in surgical cases," said Doctor Halsey.

Doctor Halsey said the apparent superiority of propylene was due to the fact that it was active even though considerably diluted with oxygen. An anesthetic depends for its usefulness on its possible administration in sufficient strength to obtain complete anesthesia, without injury from poisonous property of the gas, he pointed out. Oxygen must be administered mixed with the gas, and it therefore is essential that the anesthetic itself be of sufficient strength to bring about complete unconsciousness, even when inhaled considerably diluted with oxygen.

Descendant of Solomon Pays Visit to Europe

Ras Tafari, prince regent of Abyssinia (Ethiopia), and heir to the title, "king of kings," who recently arrived in France to begin a tour of France, Italy and England. This dusky king of Ethiopia claims direct descent from King Solomon and the queen of Sheba.

Character Is Security for Loans to Students

New York.—Holding that the character of self-supporting college students is good security for loans, the Harmon foundation of New York has instituted a plan by which its funds are lent to selected students with the expectation that the money will be repaid after graduation.

"The foundation does not lend money directly to students," says the United States bureau of education, in describing the plan, "but makes an arrangement with the presidents of certain colleges by which a stated sum is assigned for the use of students. When the plan is introduced into a college, a faculty committee of three is appointed by the president, and students in the junior and senior classes may apply to this committee for loans up to the maximum of \$250.

"An advisory committee is then elected from their number by the students chosen to receive the loans, and this committee assists the faculty committee in choosing the beneficiaries for the next year.

"All loans are to be paid in full with 6 per cent interest. In addition, 10 per cent more than the amount actually received by each student is included in the note which he signs on obtaining the loan. This excess amount is used to make up losses caused by nonpayment of loans, and four-fifths of it is used to cover losses incurred by defaults within the borrower's own group."

Bury Doll With Her

Denver.—A large doll, presented to her in Lebanon, O., and which she has cherished for 77 years, was buried here with Mrs. Matilda D. Needles, eighty-two, who died recently. The aged woman had requested that the doll be placed in the coffin with her body.

Penny in Her Throat

Escanaba, Mich.—A specialist removed a penny from the throat of Mildred, three-year-old daughter of Mr. and Mrs. Windham Winkie. The coin had been lodged in the child's throat for nearly five days.

CAUSE OF CANCER AND A CURE FOUND

Serum is Successful as Germ is Isolated.

Philadelphia.—The cause of cancer has been discovered, also a treatment for it, which, although still in the experimental stage, is producing remarkable results, according to the Philadelphia North American.

That the most dreaded disease is due to a microorganism has been scientifically established. The germ has been isolated and its parts on the sensitive factor proved by the conclusive laboratory test known as the "Koch cycle."

The discoverer is Dr. T. J. Glover, a native of Toronto, Can., thirty-six years old, and a graduate of the medical school of the University of Toronto, class of 1911. For four years he has carried on his research work in New York. The antitoxic serum he has developed apparently is effective only in the treatment of carcinoma, the commonest and most destructive form of cancer.

Tests Are Successful.

Dr. Glover first succeeded in inoculating animals with the germ he had isolated in certified specimens of cancer from human beings, and with it reproduced the disease in monkeys and all immune animals. Then, through injection of the serum, he arrested or modified its course and later immunized scores of such animals against infection.

Within the last two years this serum has been tested on more than 200 cases of cancer confirmed by pathological, X-ray and clinical histories, and in every stage of development from indolency to hopelessness.

Nearly 100 of these had been treated in the National Stomach hospital in Philadelphia, where the most complete tests have been made and the largest number of patients observed.

In a majority of these cases there have been favorable results, and in some instances the subjects have been discharged as symptom-free, a condition the laymen would call cured.

Thus it appears from the laboratory results secured by Dr. Glover, and from the records of these cases, that this terrible malady, as old as human history and of late years increasing at such a rate as to alarm both the medical profession and the public, has at last been brought to the point of control, joining the ranks of syphilis, smallpox, typhoid fever and diphtheria.

100,000 Deaths a Year in U. S.

In view of the fact that the cancer death toll in this country alone now is figured at 100,000 a year, and that the disease is increasing at the rate of 2 1/2 per cent annually, the meaning of this discovery is obvious.

The discovery of the cancer germ lends logically to the hope that a method soon may be found for determining the presence of the microorganism in the blood, thus making possible the detection of the disease in incipient and its prevention.

Dr. Glover has made significant experiments along this line, with decidedly encouraging results. He has distributed a limited amount of the serum to hospitals in various parts of the country to be tested under pledge of secrecy and without charge pending the official announcement.

From these experimental clinics there have been received highly favorable reports of results which coincide with those obtained in Philadelphia over a period of 18 months.

The Journal of the American Medical association in February, 1920, charged Dr. Glover with unprofessional conduct in trying to commercialize his discovery. Prior to that time the Toronto Academy of Medicine had made an adverse report on his work. Toronto medical men of high standing subsequently explained the situation leading to these charges in such a way as to minimize their significance.

New Camera Pictures Projectiles in Flight

Washington.—The bureau of standards has designed and constructed a new camera which is able to photograph projectiles in flight. It is not possible to take a clear picture of very rapidly moving objects on a stationary film, because in the interval during which the film is exposed the image of the object moves sufficiently to blur the picture. The new camera overcomes this difficulty by causing the film to move approximately the same velocity as does the image of the object. Hence, there is no blurring of the picture.

The bureau explains that to obtain a number of pictures several lenses are placed in a line at right angles to the direction of motion of the film and a focal plane shutter is so arranged that the images from these lenses are allowed to fall on the film in succession. This gives a series of pictures of a stationary object which lie diagonally across the film. However, if the velocity of the image is the same as the velocity of the film, the picture of the moving object will lie across the film perpendicularly to the direction of motion.

Elk Fester Farmers

Wenatchee, Wash.—Elk, said to be adept at scaling fences and making short work of ordinary haystacks, are troublesome to farmers near Okanogan. Organized groups have repeatedly driven the elk herds back into the foothills by firing blank shells over their heads, but with the return of hunger the animals revisit the farm lands.

Resources Over One Million Dollars. First National Bank Mount Airy, N. C. Has given satisfactory service to its customers for more than twenty-five years. What can we do for you? T. G. FAWCETT, President W. W. BURKE, Vice-President E. G. SMITH, Cashier

YOU SHOULD NAME THE SURRY COUNTY LOAN & TRUST CO. AS YOUR EXECUTOR FOR THE FOLLOWING REASONS: The Trust Company will see that your will is drawn correctly and, when named as Executor, makes no charges for properly drawing up the will or keeping it under seal in its vault. Directors: W. W. Burke, A. G. Bowman, W. F. Carter, E. H. Wrenn, W. A. York, F. S. Eldridge, W. W. Hampton, W. G. Sydnor, J. D. Smith. Officers: W. F. CARTER, President. W. W. BURKE, Vice-Pres. W. G. SYDNOR, Sec. & Treas.

Ward's Orange-CRUSH A Crush on the Beach. The way to a woman's heart—say, man, did you ever try the real Orange-Crush? Here are six reasons why Orange-Crush is so utterly delicious: (1) The natural fruit oil of oranges; (2) The natural acid of the citrus fruits (oranges, lemons and limes); (3) Orange juice; (4) Pure carbonated water; (5) U. S. Certified food color; (6) Pure cane sugar. That's all. My, what a drink! Try one today—in the famous Krinkly Bottle—fresh off the ice. Always insist on the Krinkly Bottle. It protects you against counterfeits. Mount Airy Coca-Cola Bottling Co.

Money to Lend. \$100,000 for the farmers of Surry County during the months of August, September and October. 33 years time at 5 1-2 per cent interest. If you owe land debts and other large debts you can't meet this fall now is the time to have them taken up while money is easy and Farm Loan Board is not rushed with applications. The Banks of the County appreciate your placing these long time loans with us as it helps them to supply short time loans for people who need money for 60 to 90 days. SEE ME QUICK.
