M., the following described real estate, to-wit:
 A tract of land lying in Surry County, and bounded as follows: Beginning at a stake in Hawkin's line, runs North 50 deg. East 20.50 chs. to a stake and pointers, Robert Burrus corner; thence, East 50 deg. S. 14.25 chs. to a stake, Leo A. Burrus corner in Robert Burrus line; thence, S. 17.42 chs. to stake and pointers in Folger's line, thence, West 50 deg. North 11 chs. to a stake and pointers, Folger's corner; thence, South with Folger's line to Hawkin's corner; thence, West with Hawkin's line to beginning, containing 26.42 acres more or less.
 Sale made to satisfy debt of Three Hundred and Fifty Dollars (\$350.00), interest and cost to be added.
 C. B. Davis, Trustee.

SUFFERED TWO YEARS
 Finally Relieved by Taking Lydia E. Pinkham's Vegetable Compound, Says Mrs. Anderson

Rangley, Maine. — "Lydia E. Pinkham's Vegetable Compound helped me greatly for bearing-down pains in the sides and back, headaches and tired feelings. I suffered for two years and it seemed as though I could not get my work done from one day to the next. After reading letters from others who had taken the Vegetable Compound I decided to try it and now I can do all kinds of work, sewing, washing, ironing and sweeping. I live on a farm and have five in the family so am busy most of the time. I recommend the Vegetable Compound to my friends and hope my letter will help some one to take your medicine." — Mrs. WALTER E. ANDERSON, Box 270, Rangley, Maine.

Over 200,000 women have so far replied to our question, "Have you received benefit from taking Lydia E. Pinkham's Vegetable Compound?"
 98 out of every 100 of the replies say, "yes," and because the Vegetable Compound has been helping other women it should help you. For sale by druggists everywhere.

AN INTERESTING LETTER FROM WHITE PLAINS FARMER

Urges All Farmers to Study Tobacco Situation—Should Raise Plenty of Corn, Wheat, Meat and Other Vegetables For His Family

White Plains, N. C., April 25th,
 Dear Editor:

You seldom have anything in your newspaper from the haysceder not I hope because you would not gladly publish their writings but because you seldom get anything from them to publish. The haysceder is conscious of the fact that he cannot write as well composed nor as grammatical an article as ye editor, lawyer, and other professional folk, hence they are loath to write anything and ask for its publication.

I have noticed for several years you have advised the farmers not to plant so much tobacco and to make what they needed, or as much as possible, to live on at home. Now I want to fall in line with you in regard to this and if I disagree with you before I get through with this article don't think I am mad with you or any one else but just stating what I think about things for us all to study about.

I wish to urge every farmer to study well this tobacco situation before he plants another big crop and figure on it and see if it would not pay him to cut this luxury crop down at least to the extent that he can certainly make enough corn, oats and hay for his horses, plenty of cow peas, soy beans, hay and other feed for his cattle, and be sure to make enough wheat, corn, meat, cabbage and other vegetables for his family.

We will suppose that John Doe has a farm of 200 acres with about six horses to work this farm, he plants about 25 acres of tobacco, making about 20,000 pounds, and selling it for about \$18.00 per hundred on the warehouse floor, which would be \$3,600.00 for his crop. The extra cost to make this is about \$450.00 for fertilizer, \$15.00 for twine, \$150.00 for wood to cure with, warehouse charges \$150.00. This is saying nothing about the flies to cure with or tobacco setters that we have to use. This makes a total of \$765.00 which taken from \$3600.00 leaves \$2835.00. Now in the majority of cases the farmer has but little money other than the \$2835.00. We will figure that he rented about two-thirds of this land and that the renters got about \$944.00 this leaving Mr. Doe with \$1891.00 to buy feed for six horses, pay taxes, life insurance, and interest on money if he owes any, which most of them do. Now if the farmer will study this he can see that the more sensible thing would be to make enough of everything to feed on and then possibly about 15,000 pounds instead of 20,000 pounds of tobacco. If he would do this they would certainly get as much for the 15,000 pounds and have the rations, feed and etc. extra.

I don't think that any newspaper should be publishing statements that tobacco will sell well for another year from the fact that there was a shortage this year. I think the farmers would be better off if they did not get such information as this. Now I am sure that all the editors want to help the farmer but I do not think this is the way to do it. We can not prevent the people figuring on these things and guessing what will happen another year but I don't think that any one who is as much interested in the farmer as they are the manufacturer should be guessing at the price of next years crop. We all think that there will be enough of the luxury made and do not think that the tobacco manufacturers would suffer if they did not get as much as they could manufacture for a few years.

I have another suggestion that I want to make to the farmers but I am not going to ask them to do this for I am not going to try it myself. I have seen this suggestion in print myself and no doubt it would work if all would go into it. The suggestion is, that if all the farmers would raise tobacco without using fertilizer this alone would cut the pounds in half and this would make competition for the sorry grade on the account of shortage and in this way the farmer would get better pay for his tobacco and more clear money. Now as I stated above I do not recommend this to any one and in fact it will not do unless all would go into it, but it sure does look like the farmers' efforts to make good tobacco are not appreciated by the manufacturer.

The season we have will always make a certain type of tobacco then they throw up their hands and say that there is too much of this certain type. Now you cannot make a farmer believe that there is as much difference in the tobacco as the manufacturers make in the price of a good rich red tobacco and good rich yellow tobacco. It is certain both can be used for the same purpose by the man who smokes or chews it, though there is a difference worked up in the trade of these tobaccos; but what I mean to say is that the red and the yellow would have the same effect on the users.

Now in conclusion lets make all we need to eat and to feed on in 1925, ask the newspaper men and all the men who get out the bulletins to be rather sparing with their information. As for the life of me I have never seen where the farmer has been benefitted by this information. As this is a crop that the whole people could do without, then why write about it in any way? Just let it go for awhile and not give out so much information about it. I am sure the farmer would be better off and I think the manufacturer could live. They usually begin in the fall about a bumper crop and an over production, then in the spring it looks good for another year. A Farmer.

The Advance From Savagery
 (From the Houston Post-Dispatch)
 Civilization may be defined as a process by which men may strive to acquire each other's chattels without bloodshed or getting into the penitentiary.

Your Home

"A Roof Over a Good Woman" is one man's definition for a home.

What is your definition?
 A rented house or a close-fitting apartment—that ISN'T home and never will be.
 Through our plan, people are coming into home ownership.
 Our home loans are made at reasonable rates and on convenient re-payment terms. Once started, it is as easy as paying rent but there's a lot more to show for it.
 Moreover our loans can't be "called" on short notice. In this respect no other plan offers equal protection FOR THE BORROWER.
 Come in and inquire—without obligation.

ALL OUT OF SORTS?
So Was This Mount Airy Woman Who Tells Her Experience

All too often women accept their pains and aches as natural to their sex. They fail to realize that weak kidneys are often to blame for that backache, those headaches, dizzy spells and that tired depressed feeling. Thousands have found new health and strength by helping the weakened kidneys with Doan's Pills—a stimulant diuretic. This Mount Airy case is one of many.

Mrs. C. F. Melton, South and Orchard Sts., says: "I suffered with pains in my back that bothered me most all the time. Some mornings my back was so stiff and sore, I could hardly get out of bed. My kidneys were all out of fix and acted too often. Doan's Pills were recommended so I decided to try them. One box from Hollingsworth's Drug Store soon strengthened my back and regulated my kidneys."

DREADFUL PAINS
This Lady Suffered Severely, Took Cardui, and Got Well.

Mrs. George S. Hunter, of Columbus, Ga., writes:
 "I suffered with dreadful pains in my sides during . . . My side hurt so bad it nearly killed me. I had to go to bed and stay sometimes two weeks at a time. I could not work and I just dragged around the house."
 "I got very thin—I went from 125 pounds down to less than 100. My mother had long been a user of Cardui and she knew what a good medicine it was for this trouble, so she told me to get some and take it. I sent to the store after it and before I had taken the first bottle I began to improve."
 "My sides hurt less and I began to improve in health. . . The Cardui acted as a fine tonic and I do not feel like the same person. I am so much better. I am well now."
 "I have gained 10 pounds and am still gaining. My sides do not trouble me at all."
 "I wish every suffering woman knew about Cardui."
 At all drug stores. C-3

How Dairy Farmers Make Concrete Earn Extra Profits!

Dairy farmers who have sanitary concrete equipment on their farms score higher ratings and receive extra profits from the sale of milk. Next to healthy stock, sanitary equipment is the most important dairy farm requirement; it builds confidence and brings buyers. Nothing else can take the place of Concrete. No other construction material is as permanent, or as practical and economical for the farmer. Its first cost is not unreasonable and its upkeep cost is practically nothing. It never rots, rusts or burns. Vermin cannot hide in Concrete: it is easy to keep clean and the most sanitary material for dairy farm equipment.

When you put in new equipment, or remodel your present equipment, find out how Concrete will serve you better, and at no greater cost. Ask any Security Cement dealer; or write direct to the manufacturer for practical information about any dairy farm equipment you need.
