THE SEGRO, THE PENSIONER, AND THE PEOPLE.

Some of the great Republican a howl over the pension roll and its magnitude of miquity. Well time changes, and men change with it. Time was, and not so long pension roll were the chief asset, gets cold! the stock in trade, as it were, of the Grand Old Party, the pensioner having succeeded the negro and social equality as the Republican shipboleth when the bloody shirt and the oppressed negro was no langer a good enough Morgan

until after election. The negrous an issue died as soon as he was educated to believe that the Republican party's suchopes never intended to be satis fied, and the negro has become 'Publican and is the tool of unseruand will be till the end of time, fatuous politicians who urge Demthem to the contrary notwithstanding. And so the negro, hav ing been educated to politically subsist on Republican sawdust and wind, became a permanent book asset of the Republican party, and was succeeded by the pensioner as an active or vote gaining asset.

It is not any part of our mission to decry the soldiers of the late war. Honest and deserving pensioners there are, and the vast majority upon the rolls are honest and deserving, but the disproportion between the number under arms at all times during the war and the number of pensioners on so costly to the country.

But the Republican party having of wood sought to harness with their master. him the soldier as the drawer of water. They have been less successful with the soldier than with the negro, but the measure of success has been sufficiently great to and having demonstrated that all crooked pensioners and many deserving ones are Republicans, a halt is being called in pension legislation under the belief that present recipients of unwise bounty unreasoning followers of the party promises.

The Grand Old Party has its followers, right or wrong, in these two classes. These followers, docide and obedient though they be, are yet in the minority, and so the Republicans are now reaching out for still another class-the bankers of the country. Aiming to get them all, there is in preparation legislation which will increase the scope, influence and numbers of the national banks and thus make it profitable for all private banks to come into the national syndicate and help perpetuate the victory of last year.

iveness of national banks, and for pare for retirement. other purposes," is another link in the chain of laws which has bound the people to the conditions of the

WHY TIMES ARE HARD.

CHAPTER IV.

Lawful Money, Legal Tender. From history we learn that pre nous to any legal acts or legisla tion relating to money, the ancients used gold and silver as a commodity medium of exchange between other products. They then had no fixed value among the tribes of men. As trade increased, by tribal consent and afterward by imperial decree and national edict of law, these two metals came to have a fixed value by weight. The limited quantity of these metals in early ages compared with the demand for them as commerce between nations increased, made it necessary that a very small quantity of them should be used to represent considerable value in other commodities, and their fineness began to receive increased attention. About the thirteenth century the English undertook to establish the fineness and quantity more completely, and had recourse to the fine metals of Eastern

Europe, known there as "Easter ling's Money," In so doing the value "Sterling Measure" was established or English money of the present day, the pound ster ling of gold being the unit of value. During this period the erroneous idea of intrinsic value originated and now finds expression as "real," "honest," or "true money." As soon as the amount and fine-

ness was established by any nation it became necessary to stamp such publicly recognized, and hence rose the term of "legal tender.

When the United States estab lished the value of coin it took as a unit the German Thaler, which was silver, and a dollar which weighs 1124 grains coin silver, troy weight, our legal silver dollar. weight and fineness of the gold dollar was determined from its rel ative value to silver in the "Easter ling's Money," and both coins were made legal tender for all debts.

At that time no nation contem plated the use and necessity for legal tender paper money, or any ore money than the two metals would afford. Some eighty five years later our Government was confronted with the necessity of issuing paper Federal money as full legal tender with gold and

The legality and power of money as a measure of value originates in law, exists in law and in law only; also its legal tender money power exists only in law. Therefore whatever of good comes through the element of money, we owe to the beneficialness of the law; and whatever of evil is chargeable to the banefulness of the law.

I claim to have shown from his tory that the functions of money exist in the law which creates it Let us analyze its functions, and we shall quickly see the part of law that is bearficial and the part that is baneful.
