pose was to include in the confines of the new department that part of the country which would be in in all likeli-hood nearest to the field of hostili-ties, in care it should come to that. The department is to in-elude the States of South Carolins, Georgia, Alabama, Florida, Mississip-pi, Louisians and Texas, all of which, except the last are at prevent attached to the Department of the rest. Atlanta was chosen as the headquarters of the new department because of its fine strategical situation, being the centre of so many railroad connections. The Department of the Missouri and Texas

Navy Wants More Men. The navy department is preparing to send out several thousand notices to be posted in the principal towns through-out the United States calling for en-listments for the navy. The advertise-ments call for men between eighteen and thirty-five years of age, except ordinary seamen who must be between eighteen and thirty. The navy depart-ment is experiencing the most difficulty in securing seamen.

CABINET FIRM.

The Action on Cuba is Certain by the United States.

Washington, (Special). - The Cabinet meeting on the 22d lasted something Ohio, seem likely to break the record over an hour and was devoted exclus- from source to mouth for high stages ively to the Spanish situation in general, of water and for damage and destrucand to the forthcoming report of the tion, Maine court of inquiry, in particular. The tone of the discussion was very firm and determined that there must come on end to the present state of affairs in Cuba. Secretary Long authorized the statement that the understanding before the Cabinet was that the re-port would reach Washington Thurs-day or Friday, that it was voluminous too that the loss to coal operators, and that its publication and transmission to Congress would not occur until next Monday or Tuesday, as the Prosi-dent would require that much time to give the document mature consideration its momentous character required.

All Against Arbitration.

There is a strong feeling in Congress against international arbitration, which it is now believed Spain will request upon receiving the report of the United States court of inquiry. Any proposition from Spain for the

appointment of a neutral court of naval experts to review the findings of the court will be considered an imputation of unfair dealing on the part of the American naval officers.

Holding Back Its Report.

The Spanish government has received its report of the blowing up of the 'Maine,' which it is witholding until the report of the United States board offer Clover, in company with of inquiry is made public. The Spanish report may be issued in an amend

THE GREAT RIVERS FLOODED.

Reports From All Over Indiana Says Dollars,

A special from Cincinnati says the water at Pittsburg is phenomenal. There has been a steady rain here since last Saturday, the 19th, during which time 2.46 inches have fallen at this point, of which four-tenths of an inch fell within the last thirty-six hours. News from central points in Indiana, and from Troy, Springfield, Urbana and Zanesville, O., indicates a fall of from 35 to 45 inches at these places. Nearly all the railroads in central and Southern Ohio are eith-er crippled or totally disabled for the present. All over Ohio and Indiana, except, perhaps, in the extreme northern parts, railroad traffic is demoralized. The Muskingum, the Hocking, the Reports from Indiana indicate that the same may be said of rivers and streams in that state.

Cluverius, wh have been in Hayana with the wreck will return very soon.

Although it is not finally settled, it will also return to the United States as soon as it is determined that nothing more is to be gained by her presence there. In the event of the abandon-ment of the wreck, it is more than likely that the Navy Department will arrange for its complete destruction by the use of dynamite or torpedoes. In its present condition it is a dangerous obstruction to navigation, and it is not believed any opposition will be offered to

THE SENATE.

60m Day .- In the Senate, Mallory, of Florida, delivered an extended speech in opposition to the national quaran-tine bill. He held strongly that the national government ought not to THE GREAT RIVERS FLOODED. trench upon the limits of the constitution by invaling the rights of the States to establish their own quarantine regulations. He advocated attemptions the national maritime. quarantine. Bacon, of Georgia, main-tained that the matter of quarantine was not a sectional question, all parts of the United States being liable to en-demics. "I favor," said he, "all the sid the government can give in the preven-tion of epidemics and the stamping out of disease, but I do not favor a regulation which will damy a State or com-munity the right to protect itself by ouarantine regulations. Previous to this, Mr. Butler, of North Carolina. made a few remarks in denunciation of At the Torrey bankruptcy measure. 0, on motion of Frye, of Maine, the Senate went into executive session, and at 5 o'clock p. m. adjourned until

Monday, 64TH DAY, -- No business of general importance was transacted by the Senate and quite unexpectedly an adjournment was taken before 2 o'clock. A batch of bills from the general calen dar was passed, but aside from that only routine business was accomplished. He con, of Georgia, introduced an amend ment which he announced he would of fer to the resolution providing for the annexation of the Hawaiian islands to the United States. The amendment provides that the resolution shall not be effective until the question of annex tion shall have been submitted to the qualified electors of Hawaii, and passes upon affirmatively by them. The amendment is the same which Bacon offered to the Hawaiian treaty and which is still pending.

65TH DAY. -In the Senate Caffrey, of Louisiana, in a speech in support of the National quarantine bill, stated that he wanted the whole power placed in the hands of the government. Foraker, of Ohio, presented the cre-deutials of his colleague, Hanna, for for the term as United States Sentor, covering six years from March 4, 1821 The credentials were read and ordered tiled.

66rn Day, -An amendment to the sundry civil bill is pending before the Senate committee on appropriations appropriating \$250,000 to furnish supplies to destitute people of Cuba. sub-committee has not yet considered the amendment, but it is stated that it will probably be adopted. The suggestion is one of the results of the conference between the President and Senators Allison and Gorman, and it is the understanding in the committee that the Presiden will follow the suggestion with a re quest to Congress that the appropria-tion be made. He thinks it as well that the money with which to relieve the distress of the Cubana should come from the national Treasury, as that i should be collected by private sub-scriptions. Democrat. TOTH DAY. - The House spent another day on the postoffice appropriation bill, but only disposed of two pages of it Most of the day was devoted to a debate on the merits of the pneumatic tube mail service in New York, Boston and I hila delphia, and the advisability of tinning the existing contracts. An of fort to strike out the appropriation of 25,000 was defeated, but the opponents f the appopriation succeeded in securing an amendment providing that additional contracts should be made. An amendment was adopted making it a misdemeanor for any person to "pad for seacoast fortifications. Engineer Kinney Gets a Verdict for Twenty Thousand Dollars

AGAINST THE N. C. RAILBOAD

The Verdict is a Vindication of All the Discharged Men-The Attornevs on Both Sides.

The suit of Engineer Kinney against the North Carolina railroad, which has been on trial for three days ended in Lexington on the 19th. Kinney was the engineer on No. 11 on the morning of April 11, 1897, when No. 11 and No. 36 collided and killed four persons and injured several others, Kinney was horribly scalded, maimed for life and not expected to live. But he did survive, and he and Conductor Lovell and Engineer Tunstall and Conductor Gentry, on No. 36, were all discharged by the railroad. Kinney brought cuit. The two when the House convened last lines on which the case were brought were that kinney charged that the disaster was due to negligence in Su-perintendent Rider's office, and the rathroad charged the negligence on the plaintiff and his associate employes. The jury found that Kinney was not to blame and fixed the ratiroad with neg-ligence and gave Kinney a verdict for \$20,000. The verdict is a vindication of all the discharged men. The plaintiff's attorneys were B. F. Long, C. B. Watson and F. C. Robbins and the defendant's were G. F. Bason, Charles

There can be no possible doubt of the fact that this country is just now upon the verge of war. It cannot be doubted that the administration expects it and is prepared for it. All the telegraphic preports of the rant few days indicate that much the using the intense nexlety of the country over the outcome, it seems reasonable to believe that the administration would ince given the public some assurance before this time, if it could have done so consistently with the facts in its possession, but so far it has given none, but according to the latest from Washington we can rest assured that we will know the outcome of the report of the boar of inquiry in a few days.
