According to statistics from the cotton growing States, North Carolina is sure to raise 63 per cent of a crop and the South at large 66.

OPERATION ON SKULL REFORMS PRISONER

Convict's Change Causes Jersey Pardon Board to Grant Him Freedom. Once Rebellious, Now Gentle.

Trenton, N. J.—The New Jersey court of pardons announced recently that at its meeting a long list of applications from convicts for pardon and parole had been considered.

A noteworthy case for parole acted upon favorably was that of James Szikely, a Hungarian, sentenced to serve thirty years in state prison for killing a fellow countryman in Warren county. The murder was particularly brutal. Szikely manifested morose tendencies in prison and complained continually of pains in his head. Dr. Martin W. Redden, a surgeon of Trenton, and the visiting prison physician, decided to operate on the prisoner's skull. For a time after the operation the man hovered between life and death, but his condition improved and he was restored to his faculties. From a sullen, rebellious prisoner he became a willing, eager and kindly worker. He could remember nothing whatever about the crime for which he had been given a long sentence. The operation established a precedent in the medical world.

Just the Thing for Diarrhoea.

"About two years ago I had a severe attack of diarrhoea which lasted over a week," writes W. C. Jones, Buford, N. D. "I became so weak that I could not stand upright. A druggist recommended Chamberlain's Colic, Cholera and Diarrhoea Remedy. The first dose relieved me and within two days I was as well as ever." Many druggists recommend this remedy because they know that it is reliable. Obtainable everywhere.

Katy-dids have been breaking the silence of the early hours of the night for some time by their sharp, shrill song. It is said that the first katy-did song precedes the first frost by ninety days and those who have observed the coming of the katy-did this year say that frost will come about October 9th.—Wilkes Patriot.

Will Sloan's Liniment Relieve Pain

Try it and see—one application will prove more than a column of claims. James S. Ferguson, Phila., Pa. writes: "I have had wonderful relief since I used Sloan's Liniment on my knees. To think after all these years of pain one application gave me relief. Many thanks for what your remedy has done for me." Don't keep on suffering, apply Sloan's Liniment where your pain is and notice how quick you get relief. Penetrates without rubbing. Buy it at any Drug Store. 25c.

The Child Labor Law, just passed by the Senate, will be given a thorough test before it is allowed to remain in effect. As soon as the law goes into operation, whether within one year after it is enacted, or in two years, a test of it will be made.

Liver Trouble.

"I am bothered with liver trouble about twice a year," writes Joe Dingman, Webster City, Iowa. "I have pains in my side and back and an awful soreness in my stomach. I heard of Chamberlain's Tablets and tried them. By the time I had used half a bottle of them I was feeling fine and had no signs of pain." Obtainable everywhere.

The State Supreme Court will meet for the fall term August 28th. Applicants for law license will be examined on that day.

The Best Laxative.

To keep the bowels regular the best laxative is outdoor exercise. Drink a full glass of water half an hour before breakfast and eat an abundance of fruit and vegetables, also establish a regular habit and be sure that your bowels move once each day. When a medicine is needed take Chamberlain's Tablets. They are pleasant to take and mild and gentle in effect. Obtainable everywhere.

Five graduate nurses have gone from Charlotte to New York city to aid in the fight against infantile paralysis.

Cure For Cholera Morbus.

"When our little boy, now seven years old, was a baby he was cured of cholera morbus by Chamberlain's Colic, Cholera and Diarrhoea Remedy," writes Mrs. Sidney Simmons, Fair Haven, N. Y. "Since then other members of my family have used this valuable medicine for colic and bowel trouble with good satisfaction and I gladly endorse it as a remedy of exceptional merit." Obtainable everywhere.

OUR FIRE INSURANCE RATES

Law Has Undertaken to Furnish Citizens of State With True Rates on Their Property.

Our law has undertaken to have the citizens of the State furnished with the fire insurance rates on their property. They must be in detail. Read the law:

"Agents Must Inspect Property—Policy, How Stamped.

"Section 3. There shall be printed, stamped or written on each fire policy issued in this state, the basis rate, deficiency charge, the credit for improvements and the rate at which written, and whenever a rate is made or changed on any property situated in this state a full statement thereof showing in detail the basis rate, deficiency charges and credits, as well as rate proposed to be made, shall be delivered to the owner or his representative having the insurance on the property in charge, by the company, association, their agent or representative with a notice to the effect that said rate is promulgated and filed with the insurance department. Every agent of a fire insurance company shall, before issuing a policy of insurance on property situated in a city or town, inspect the same, informing himself as to its value and insurable condition."

In addition, the synopsis of the rate must be on each policy, under this or similar form.

FITTING ITEM FOR SMOKERS

Carelessness With Lighted Cigarettes Causes Many Fires of "Unknown Origin" In Course of Year.

We have our reform leagues, anti-cigarette societies, etc. These have statistics to show the harm done by the cigarette user to his physical and mental system. But the greatest damage done by the cigarette smoker is not inflicted upon himself. The greatest danger from cigarette smokers is that which they inflict upon others. After some study and observation I have reached the conclusion that the cigarette smoker is one of the worst fire hazards of the present day. Most hazards can be seen and guarded against, but the cigarette hazard is seldom apparent until after the damage is done. Usually the evidence is burned.

The habitual cigarette smoker is generally careless and indifferent. He will take a smoke on the sly. If some one with authority comes along as he has the cigarette half-smoked, he deftly throws it in an out-of-the-way corner and promptly forgets about it. The so-called Turkish or Russian blend cigarettes will burn and smolder until they are completely burned to the end. Unless the smoker takes the precaution to see that they are out before they are thrown away, to light on waste or refuse, nine chances out of ten there will be an item in the papers stating that Such & Such Company suffered from a fire of unknown origin. Damage, about \$2,500. Covered by insurance. An investigation is now being made. Would the one who threw the cigarette away admit it? Never! He probably has forgotten about it. He has done it so often that it has become second nature with him when he has finished smoking to toss the cigarette away and forget it. It is all in the "day's work," done and forgotten.—Insurance Herald-Argus.

United States in Need of Second Lieutenants.

West Raleigh, Aug. 9.—President W. C. Riddick of the A. and M. college has just received notification from the adjutant general that there are now 1,500 vacancies as second lieutenant in the United States army. The new bill authorizing the enlargement of the standing army has caused many former second lieutenants to be promoted to the rank of first lieutenant.

In a letter to Professor Riddick the adjutant general states that there will be a competitive examination held August 21 for these appointments, and also that all students and graduates of the A. and M. college will be eligible for appointments, provided they can pass the mental and physical examinations.

HOME TRADE MEANS HOME SAVINGS.
This paper is booming this town all the while. HOW ABOUT YOU?

SOME DAY PEOPLE WILL ACT

Will Demand Fire Protection in Mills, Factories, Stores, and All Other Crowded Places.

Rating bureaus occasionally find it necessary to suggest certain improvements and the adding of approved fire protection equipment in mills and factories, and in department stores and other places where people work or congregate. These suggestions are always made for the purpose of saving human life and protecting property, and also with the intent of giving due credit for such improvements, thereby reducing the cost of insurance on the plant. Although true economy is subserved by following these suggestions, which are invariably in the interest of the owner, despite the initial cost of such improvements, some property managers or owners show a spirit of resentment and look upon the advice of the rating bureau as an interference with their rights of proprietorship.

Apart from imposing deficiency charges for the absence of approved fire protection equipments, the rating bureaus have no authority to enforce the observance of their requirements. But is it to be taken for granted that the matter ends at this point? Does not the menace to life and property continue? And is it to be accounted just and wise that the false ideas of economy on the part of individual property owners are to be accepted as being superior to the welfare and safety of the entire community? Here is a point where law makers and the people either fix or consent to conditions which frequently result in costly fires and high insurance rates, but which conditions the people themselves will not hesitate to remedy when the light of full knowledge finally breaks upon them.—Fire Facts.

GIRLS IN LOVE TO SAVE PENNY A DAY

When a Quarter Is Obtained It Is to Go to Needy Families of Soldiers.

Philadelphia.—Is the possible war responsible? Or is it just a feminine desire to do what other girls are doing? Miss Nathalia Schaeffer is asking herself these questions. They refer to the epidemic of engagements among her friends which seems to be following her invitation to join a club for engaged girls only. The organization, she explained in her invitation, was to be known as the Engaged Girls' Contribution club, and its purpose was to be the helping of families of soldiers in need.

Miss Schaeffer is twenty-three, blond and pretty. Otherwise the Engaged Girls' Contribution club might never have been organized, because she might not have become engaged recently. Who the bridegroom to be is remains a mystery, as she refuses to disclose his name.

But because of her engagement she thought of other engaged girls and one evening at her home here figured out the club which would bring engaged girls together and do some good besides. Members are to save one penny each day until a quarter shall have accumulated, which they will send to the mayor of whatever city they live in to be turned into a general fund for soldiers' wives and children. It is to be known as Cupid's fund.

Fire and Water.

Salt water is considerably more effective than fresh water in extinguishing fires.
