

LAND FOR SALE

Take notice that whereas on the 5th day of June, 1926, Sam Boyce and wife executed a Deed of Trust to the undersigned Trustee and which is recorded in Book 26 at page 146 of McDowell County Mortgage Deed Records, conveying the lands therein and hereinafter described as security for an indebtedness therein described to the Home Building Association of Marion, N. C., in which Deed of Trust it was provided that in the event there should be default on the part of the said Sam Boyce and wife to comply with the constitution and by-laws of said Association in paying the monthly installments on shares of stock described in said Deed of Trust for a period of sixty days, the Trustee should, when requested by the Home Building Association, sell the lands therein described for the purpose of satisfying the indebtedness to the said Association, and whereas there has been such default and said Association through its Board of Directors having demanded of the said Trustee that he foreclose under the power of sale granted in said Deed of Trust: Now therefore, the undersigned Trustee will, for the purpose of satisfying said indebtedness, on Monday, May 27th, 1929, at 12 o'clock noon at the courthouse door in Marion, N. C., offer for sale to the highest bidder for cash all that certain piece or parcel of land lying and being in the County of McDowell and bounded and described as follows: Beginning on a black oak about 10 inches in diameter, standing on a bluff (the intersection of two small ravines bears S 35 degrees E 45 feet) and runs S 85 1/2 E 210 feet to a stake at edge of the old Marion and Bakersville road; thence S 19 1/2 E 105 feet with said road to a stake; thence N 85 1/2 W 210 feet to a stake; thence N 19 1/2 W 105 feet to the beginning, containing 1.2 acre more or less, and being more fully described in a deed from C. H. Callahan and wife to Sam Boyce and wife, dated October 23rd, 1925, and recorded in Book 67 page 510 of McDowell County Deed Records, to which reference is here made for more specific description.

This the 24th day of April, 1929.
J. W. WINBORNE, Trustee.

NOTICE OF SALE OF LAND

Under and by virtue of an order of the Superior Court of McDowell County made in the special proceeding entitled B. G. Dalton, administrator of the estate of B. W. Dalton vs. Sarah C. Davis et al., the same being No. 1000 upon the special proceedings docket of said court, the undersigned commissioner will, on the 1st day of June, 1929, at two o'clock P. M., at the courthouse door in Marion, North Carolina, offer for sale to the highest bidder for cash that certain tract of land lying and being in Crooked Creek Township, McDowell County, North Carolina, and more fully described as follows: Beginning at a stone, C. C. Nanney's corner, also Justice's corner, and runs North with Justice's line 31 rods 113 poles to a pile of stone, his corner in Patton line; thence West 49 poles to a chestnut, C. C. Nanney's corner; thence with Nanney's line South 90 poles to the beginning, containing 17 1/2 acres, more or less.

This 25th day of April, 1929.
L. M. ABERNETHY, Comr.

NOTICE

Having qualified as Administrator of the Estate of James G. Reynolds, deceased, of McDowell County, N. C., this is to notify all persons having claims against the Estate of said deceased, to present them to the undersigned at his office on or before the 25th day in April, 1930, or their recovery. All persons indebted to the said Estate will please make immediate payment.

This 25th day of April, 1929.
D. F. GILES,
Administrator of James G. Reynolds, Deceased.

NOTICE

North Carolina, McDowell County. In the Superior Court, Before the Clerk.

WILLIE DICKSON
—vs—
HENSILE MILLNER.

The defendant in the above matter will take notice that an action entitled as above has been instituted in the Superior Court of McDowell County by Willie Dickson for the purpose of obtaining an annulment of her marriage upon the grounds of duress; and the said defendant will further take notice that he is required to appear within fifty days before the undersigned and answer or demur to the complaint of the plaintiff within the time allowed by law, or the plaintiff will apply to the Court for the relief demanded.

This 19th day of April, 1929.
J. L. LAUGHRIDGE,
Clerk of Superior Court.

NOTICE OF APPLICATION FOR PARDON OF ROTHIE MILLER

Application will be made to the Commissioner of Pardons and the Governor of North Carolina for the pardon of Rothie Miller convicted at the September Term, 1928, of the Superior Court of McDowell County for the Crime of Larceny and sentenced to the State Prison at Raleigh, N. C., for a period of two years. All persons who oppose the granting of said pardon are invited to forward their protest to the Commissioner of Pardons without delay.

April 29, 1929.

ADMINISTRATOR'S NOTICE

Having qualified as administrator of the estate of James O. Moore, deceased, late of McDowell County, N. C., this is to notify all persons having claims against the estate of the said deceased to exhibit them to the undersigned at Old Fort, N. C., on or before the 9th day of May, 1930, or this notice will be pleaded in bar of their recovery. All persons indebted to said estate will please make immediate payment.

This 6th day of May, 1929.
T. B. FAW, Administrator
of James O. Moore, deceased.

ASPIRIN
Aspirin is the trade mark of Bayer Manufacture of Monocetaceticacidester of Salicylicacid

Badly Run-Down

"Six years ago, I was very much run-down," says Mrs. Olympia Knight, of Lovett, Ga. "I did not sleep well, and was weak and restless. I dragged around the house with not enough strength to do my daily tasks. I worried a lot, and this disturbed state of mind reacted on my health."

"I had often read of Cardui, so I thought I would try it. I soon began to improve after I had taken Cardui for a while. It was astonishing how much I picked up. I slept better, my appetite improved, and that awful dragging-down feeling left me. I was so much better that I continued taking Cardui until I felt perfectly well. Cardui has been used by women for over 50 years. For sale by all druggists."

Take Theford's Black-Draught for Constipation, Indigestion and Biliousness. C-140

WHY YOUR STOMACH GRUMBLES

Your stomach "grumbles" because it tries to tell you it is out of order. Heed its warning, for although the trouble may not yet be serious, it is often the forerunner of severe gastritis and stomach ulcers.

Nine times out of ten indigestion and allied stomach disorders are due to excess stomach acid, which impedes normal digestion and forms sour gases that cause intense pain. To restore good digestion you must eliminate this cause. A tablet of "Pape's Diapepsin" after eating or when pain is felt will instantly neutralize the acidity and banish all digestive trouble and pain.

Get a 60-cent package of "Pape's Diapepsin" today, for it not only brings instant relief, but by soothing, healing and strengthening your weak and disordered stomach "Pape's Diapepsin" keeps your digestive system healthy and helps to prevent further disorders.

NOTICE

North Carolina, McDowell County. In the Superior Court.

A. L. Beach and Thomas Beach
—vs—
John I. Beach, Thaddeus Moore, Baxter Lee Moore, Eugene Moore, Geo. Moore, Troy Moore and Bennie Moore.

The defendant John I. Beach will take notice that an action entitled as above has been commenced in the Superior Court of McDowell County, North Carolina, for the sale of land for partition in which the said defendant is interested; and the said defendant will further take notice that he is required to appear at the office of the Clerk of the Superior Court of said County in the courthouse in Marion, N. C., on the 3rd day of June, 1929, and answer or demur to the complaint in said action within thirty days from said date, or the plaintiff will apply to the court for the relief demanded in the said complaint.

This the 2nd day of May, 1929.
J. L. LAUGHRIDGE,
Clerk of the Superior Court
of McDowell County, N. C.

Doll makers in this country turned out about 25,000,000 dolls this year.

Orchard Information

NUB OF PRUNING OF APPLE TREES

For Growing Fruit Work Best Done in Winter.

Recent remarks made at a horticultural meeting by John Nordine, Lake City, Minn., give the gist of the whole pruning principle in a nutshell. He says:

"In our times we are finding individual planters in the country who have set out what are called commercial orchards. These orchards are not giving the results that they should, and a good many farmers are getting discouraged and giving it up and saying that fruit trees cannot be grown in our state successfully. Others are trying to fertilize their orchards, spraying them, but when it comes to the pruning they are helpless, and they go out and get a man who says he has been pruning some but don't know much about it; and it don't take a man of this kind long to destroy further the fruiting quality of any orchard."

"The pruning of fruit trees consists chiefly of two things: (1) what may be called the mechanical pruning of the framework of the trees or so forming the tree that it may be able to take care of a heavy load of fruit or to withstand a strong wind or carry up well under a heavy snow. (2) The pruning for growing fruit and fruit buds. The mechanical pruning should be done when the trees are dormant or in the first part of June. The pruning for growing fruit should be done when the tree is dormant, and then done only by cutting away small branches of apparently blind wood, and the small blind spurs near the fruit buds, all unnecessary limbs inside the tree that produce only shade and cross the fruit bearing branch, rubbing off both bark and buds. In other words, the tree should be pruned so as to make it easy to spray the tops and let the sunlight in to every part of it. Then you have gone a long way to produce the fruitfulness of a tree."

Bud Moth Damages Fruit as Blossoms Are Open

The chief injury to apples done by the bud moth comes just as the blossoms are unfolding, the caterpillars burrowing into the buds cut the blossoms and leaves at their base. In seasons when the bloom is light and when the conditions are unfavorable for pollination the destruction by the bud moth of blossoms which might produce fruit constitutes a serious menace.

The bud moth caterpillars may also eat into the young apples, especially where a leaf overlaps the fruit, causing the fruit to drop or resulting in deformed apples unfit for the market. Losses as high as 43 per cent were sustained from this cause the past season, while losses of from 25 to 35 per cent were not at all uncommon, it is reported from the Geneva station. Economical control of the bud moth can be obtained by following the routine spray schedule.

Well-Drained Gravelly Loam Will Help Grapes

Grapes do well on a wide range of soils, but they prefer a well-drained gravelly loam. They require good drainage and will suffer far more from wet feet than from lack of a fertile soil. The subsoil should not be so heavy that it will hold the water. For best results it should be light and porous, such as a gravelly loam.

The vines will grow on soils too poor for any other crop, but that does not mean that they thrive best under such conditions. It merely means that they do better than other crops. On very poor soils the vines make such poor growth that they cannot produce good crops and require constant fertilization or the yield drops very greatly.

Peach Aphis Emigrates to Herbaceous Plants

With the exception of the black peach aphid, all the species migrate from the fruit trees in late spring and early summer to various herbaceous plants. They return to the foliage of the trees in autumn. The black peach aphid feeds chiefly on the bark of sprouts and on the smaller branches of peach trees. The plum-thistle aphid feeds on the under surfaces of the leaves and on the green tips of branches. The other species confine their attack to the leaves which frequently are severely curled. Many of the injured leaves may fall from the trees in cases of pronounced infestation.

Fertilizer in Orchard

One's orchard, like all other crops, should have fertilizer to produce a good crop. Peach trees should have little nitrogen and a high per cent of phosphate and potash; for other fruits, such as plums, cherries, apples, and pears, the above is also good. A mixture of one part cottonseed meal, two parts phosphate, and two parts potash is good for the trees mentioned, and the amount can be determined according to age of tree, one pound of fertilizer to each year.

Salvaging Old Homes Point of Importance

"New homes mark the prosperity of the nation," was the point made by the president of a leading building and loan association, in a recent address. "Salvaging older homes shows a continued pride in community progress, a work of equal economic importance with that of original home buying."

"Walk down the Main street of your town, just as we can walk down the Main streets of a hundred towns, and pick out the properties which are beginning to show need of painting, or re-roofing, or stuccoing. Depreciation only too often affects not only that one house but the entire neighborhood in which it is located. Careful surveys have shown that they are so old or so poorly planned and built that they are now in definite need of complete remodeling both as to exterior, interior and modern equipment, such as heating and wiring."

"Economically, such reconstruction is sound, provided only that the location of the property is good and that the original construction is of such quality that remodeling is worth while. No use in re-roofing a house with sagging floor joists. Better tear it down."

"Financing new homes must always be the foremost building and loan work. But rebuilding old homes and improving comparatively new ones becomes more important yearly as the influence and ability to serve of the building and loan association grows with increasing resources. During 1928 one building and loan association allowed a total of 1,949 home loans, aggregating \$11,895,752, of which 784, totaling \$1,288,900, were rebuilding or remodeling loans. In comparison 506 loans of this type allowed during 1927 totaled \$972,550. Thus, we see a decided increase in calls for home improvement."

Must Work Together for Community Chest

Elwood Street, director of the community chest, told the Laymen's League of All Soul's Unitarian church, Indianapolis, that "social work as practiced by the agencies which make up the community chest is the age-old spirit of charity in modern guise."

"We have found, however," said Mr. Street, "that these agencies cannot be effective if each goes at its work by itself. We have learned that we must have co-operation and teamwork if these agencies are to work effectively and economically and serve the community adequately."

"The consequence of our seeing the community as a whole and of our realization of the need of unity in social planning and action has been the creation of our council of social agencies for effective planning and for the improvement of methods and of the community chest as a means of joint finance with resultant economy in money raising and efficiency in money spending."

Ten pure bred Hereford bulls have been placed in Avery county through the efforts of the county agent to revive the lagging beef cattle industry.

It costs very little to recondition a MODEL T FORD

THE Ford Motor Company is making a new car, but it is still proud of the Model T. It wants every owner of one of these cars to run it as long as possible at a minimum of trouble and expense.

Because of this policy and because of the investment that millions of motorists have in Model T cars, the Ford Motor Company will continue to supply parts as long as they are needed by Ford owners.

So that you may get the greatest use from your Model T, we suggest that you take it to the nearest Ford dealer and have him estimate on the cost of any replacement parts that may be necessary.

You will find this the economical thing to do because a small expenditure now will help to prevent costlier repairs later on, increase the value of the car, and give you thousands of miles of additional service.

For a labor charge of only \$2.60 you can have your generator put in first-class condition. A new universal joint will be installed for a labor cost of \$3. Overhauling the carburetor costs \$1.50; steering gear, \$3.50; radiator, \$7.50. A complete overhauling of the rear axle assembly runs between \$5.75 and \$7 for labor. An average price of \$22.50 covers the overhauling of the motor and transmission.

These prices are for labor only because the need and number of new parts depend on the condition of each car. The cost of these parts is low, however, because of the Ford policy of manufacturing and selling at a small margin of profit.

FORD MOTOR COMPANY

You can bank on the quality of a cigarette that continues to be the biggest success in smoking history

CAMEL CIGARETTES

WHY CAMELS ARE THE BETTER CIGARETTE

Camels contain the choicest tobaccos grown . . . expertly blended for matchless taste and fragrance.

They have a welcome mellowness and mildness that you will find in no other cigarette. Smoke them as often as you like, Camels never tire your taste.

The quality of Camels is never permitted to vary.

Only a superior cigarette could have won and held world leadership for all these years as Camel has done.
