

MANY GUESTS LINGERING

Spring's Fascination Will Hold Them
Captive for Some Weeks Yet.

Glorious Sunshine, Crisp Air and a
Wondrously Beautiful Land-

THE MONTH of May will be well advanced before the last of this season's guests have gone, for Spring's fascination is holding many captive. The delightful weather which has been the rule for weeks past, continues and Nature is in her most charming mood. Life here is in consequence, much in the open, and each day seems too short.

BIRTHDAY ANNIVERSARY.

Master Graham Gardner Entertains Young Friends at Palmetto.

Master Graham Gardner, who has been spending the winter at the Palmetto with his mother, Mrs. L. F. Gardner, Boston, observed his tenth birthday anniversary, Tuesday evening, by entertaining ten of his younger friends. Refreshments were served and the evening passed pleasantly with games.

Mrs. Gardner has given the party annually for several years in honor of this event, the special feature being that the number of guests shall each time correspond with the age of her son.

THE ARAB HORSE.

Scientists Making an Investigation Into Its Origin.

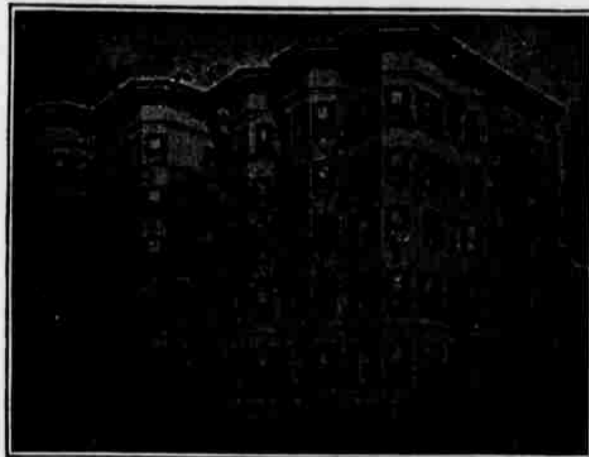

According to United States Consul Halstead at Birmingham, British scientists are engaged in an investigation of the origin of thoroughbred and Arab horses. A recent report to the British Museum said that the skull of a horse from India showed a slight depression in front of the eyes, evidently representing the pit for the face gland (like that of a deer), which existed in the extinct three-toed hipparions or primitive horse, and that a similar depression had been noticed in the skulls of the racers Stockwell, Ben d'Or, Eclipse, Orlando and Hermit, and is said to have existed in a rudimentary condition in the fossil true horses of India.

This peculiarity is said to be lacking in the skulls of horses from the drift and tertiary of Europe. In other words, this face-gland rudiment exists in the skulls of all thoroughbred and Arab horses that have been examined and is absent in those of European horses. This has suggested the presumption that the Arab and the thoroughbred have an origin quite apart from the horses of western Europe, presumably from an eastern form, related to the fossil horses of India.
