Winners At The Traps

ALBERT TUFTS, of Pinehurst, led the field in the weekly 100-target handicap tournament at the Gun Club this week and won the prize with a net score of 89-10-99. M. F. Timmer, of Ashley, Pa., finished second with 90-7-97, and M. B. Orr, of Piqua, Ohio, was third high gun with 90-6-97.

The best gross shooting of the day was done by Tracy H. Lewis, of New York, who broke 91 and finished with a net score of 91-4-95. Other good scores were Henry Page, Jr., Aberdeen, 85-7-92; B. V. Covert, Lockport, 79-6-85, and Norwood Johnston, Pittsburgh, 78-6-84.

Miss Katherine Lewis, of Chicago, registered 135 points out of a possible 150 in the rifle shooting contest for women and won the prize. Mrs. H. M. Galleau, of Montreal, registered 132, and a tie, at 110, resulted between Miss Christina Stevens, of North Hoosick, N. Y., and Miss Dorothy Davis, of Toronto. Miss Page Lewis, age 12, took part in the shoot and finished with the very creditable score of 98. Others shooting were Miss Jessica Johnston, of Toronto, 98, and Miss Thelma Cowan, Montreal, 95.

M. And M. Launch New Ship

PINEHURST patrons of the Merchants and Miners Steamship lines, plying between Norfolk and Boston, will be interested in the recent announcement that their new steamship "Berkshire" has been launched and will be in service this spring.

The Berkshire follows the Alleghany which was launched in December. Both vessels are 367 feet long with 52 feet beam and gross register of 4,000 tons with a speed of 13 knots.

The steamers have four freight and two passenger decks. Passenger accommodations on the hurricane and promenade decks are most inviting and combine baths and other accessories for comfort. The decks are wide and ample for promenading. The steamers have some single state-rooms, some double and others to accommodate three passengers. Both steamers will be oil burners, convertible to coal.

Electrical Resources This Section

(Continued from page 4)

Electricity as it is now developed is so cheap that it has as much to commend it from the point of economy as from that of efficiency. It has passed the day of experiment and uncertainty, and reached the period of effective and economical performance. Light and power derived from the water power of the streams of the county are supplied at much less cost than where they come from oil and coal brought from distant states. Electricity has also the advantage that it is immediately available when wanted and as equally susceptible of being shut off when it is no longer needed. Its range is so much wider, its results so much cleaner, and its operation so much simpler that it is the ideal light and power agent, and as it comes to be better known Moore county will be still more completely gridironed with electric wires than is the case at present.

Not only Pinehurst, but all the rural region and all the other villages in the county, will before much longer be provided with buttons to push whenever any occasion arises. The villages have had lights for some years. Gradually they have been finding out that many things besides light are to be had, and now village and country house both are awakening to the fact that electricity is almost a universal servant anywhere in the county. Electricity is to be one of the most valued adjuncts of life in the Pinehurst territory from now on, and anybody who has not yet taken advantage of what electricity will do in the home, on the farm or any where around the place will profit by looking into the matter.
