

# Silver King

TRADE MARK

**“King O’ Them All”**

Occasionally challenged, but never equalled, because no matter how good other balls become, the Silver King is so improved each season as to be always in the lead.

*Not a nine days’ wonder—but  
more than a nine years’ favorite*

It bores like a bullet into the wind. It flies low and true and far. Its distance is as long as its durability is strong—and every golfer knows that the Silver King is the most durable golf ball ever made. Even at \$1.00 it is the most economical ball for every golfer to play—even the beginner.

*Silver King balls are always uniform*

Not one fast and another slow, not one true in flight and another wavering, not one true-centered and another wobbly. This perfection—found only in the Silver King—is due to the marvelous resiliency of the ball, enabling it to keep its shape, round after round, the result of absolute uniformity in winding.

Thus the Silver King always inspires *confidence* in the player—and confidence is the secret of successful golf.

*The Silver King is the largest  
selling golf ball in the world*
