If the first half of new Dyanap™ doesn't get all your weeds, the second half will.

New 2-in-1 preemergence herbicide gives you 2-way weed control for peanuts without mixing.

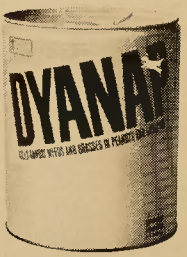

1. Dinitro knocks out surface weeds on contact.
2. Alanap® stays in the soil to pick off weed seedlings as they germinate.

Now you can get two of the most effective herbicides ever developed for peanuts, in one can. This means goodbye field mixing. Messy powders that clog your sprayer and nozzles. Just pour Dyanap and water into your tank and spray at cracking time with your regular equipment. That's all there is to it.

What about yields with Dyanap? After five years of tests, N.C. State University has the answer. Their report shows that yields with Dyanap treatment were consistently at the top of all treatments. On top of this, Dyanap costs less than other herbicides.

Dyanap is effective against all the annual weeds and grasses that plague peanuts. Florida pusley, Chickweed, Pigweed, Lambsquarter, Ragweed, Cocklebur, Crabgrass, Barnyard grass, And foxtail.

Make weed control easy on yourself this year. Get all the facts now about new pre-mixed Dyanap. Your nearby chemical distributor is the man to see.
