

NEW GINNING OPERATION—A new building housing a new all-electric ginning system for Rich Square Gin Company has recently been completed and is now in operation. The all-steel

building was erected on the site of the old gin, owned and operated for more than a quarter of a century by R. W. Outland of Rich Square. Gin manager is Jimmy Outland.

Rich Square Gin Using All-Electric System

RICH SQUARE — A complete, brand-new ginning operation is available to cotton growers in the Rich Square area this season. An all-steel blue building equipped with an all-electric Lummus ginning system has been constructed on the site on East Jackson Street where Rich Square Gin Company has been in operation for more than a quarter of a century.

The new operation will continue under the name of Rich Square Gin Company, according to the owner, R. W. Outland of Rich Square, who said they are ready to handle both mechanical and hand-picked cotton.

The gin is equipped with two green leaf stick machines and two hot air incline cleaners for the pre-cleaning process. A super jet cleaner and double saw type lint cleaners are new equipment available for the lint preparation process. The gin also features the Lummus model 66 Imperial 88 saw gins and operates on 580-horse-power.

All equipment is designed and installed for safety and efficiency. Electric switches and buttons controlled in a panel like desk control each unit of the ginning process. The cleaners are equipped with magnetic forces to capture any harmful or foreign particles.

Without any release the gin is capable of handling an individual farmer's cotton. The average output of the system is 10 bales of cotton per hour.

Construction of the new building was started in early May, 1965 following demolition of the old building. Cement foundations were poured according to Lummus blueprints. Personnel of the Lummus Company installed the

machinery and electrical installations were supervised by Virginia Electric and Power Company.

Delta Kappa Gamma Has New Officers

ROANOKE RAPIDS — Delta Kappa Gamma, national honorary society for outstanding women educators, met Saturday at the Rebel Restaurant here.

Members include 50 representatives from the counties of Halifax, Northampton and Edgecombe.

New members initiated Saturday were Nell Robertson Martin of Jackson and Alene Early Neville of Enfield.

Officers of the local Alpha Kappa chapter for 1965-66 are: Dorothy S. Moore of Enfield, president; Gwen B. Dickens of Halifax, first vice president; Ella M. Stokes of Severn, second vice president; Madge Bridgers of Conway, recording secretary; Mary E. Lassiter of Woodland, corresponding secretary; Sara Cannon of Roanoke Rapids, parliamentarian; and Verona R. Draper of Weldon, treasurer.

Thomas Mincher Receives Degree

DURHAM — Thomas D. Mincher has completed requirements for the degree of bachelor of arts at Duke University where he majored in accounting.

He is a graduate of Roanoke Rapids High School and husband of the former Judy Futrell of Woodland. They are parents of a son.

Mincher is now employed in the office of A. N. Pullen and Co., certified public accountants in Greensboro.

TECHNICAL TRAINING — Airman Michael A. Aston, son of Mr. and Mrs. Lee Aston of Milwaukee, has been selected for technical training at Chanute Air Force Base in Illinois as a U.S. Air Force jet mechanic. Airman Aston, a 1965 graduate of Northampton County High School, recently completed basic military training at Lackland Air Force Base in Texas.
