Madame Curie, co-discoverer with her husband, of radium, is dead in France. It is said that the cause of her death was too many radium rays in her body.

How many people lost their lives and heads at the orders of Hitler, in his attempt to consolidate his position in Germany, during the past week, is not known, and may never be known. Nazi sources admit that around 50 or 60 leaders of Germany were either summarily shot, hanged, beheaded, or given their choice of suicide or death before a firing squad.
