The state of Wisconsin has decided that a hunter who wants to shoot leer with a bow and arrow instead of a rifle may have a license to do so. For my part, I think it is a much .ore sporting proposition to hunt icer with bow and arrow than ath a modern high-powered rifle. it gives the game at least a better oreak and certainly provides the nunter with just as much exercise and fresh air, or perhaps even more I have never been able to sympathize with the desire of men to go out and kill harmless animals like

deer. It is quite a different proposition from killing in self-defense or for food. It seems to me there is just as much sport and a great deal more humanity in shooting game with a camera than with a gun. UOOPERATION

Sweeping the country from coast to coast and from border to border, the Democratic party won the most complete victory, in Tuesday's election, that was ever accorded a political party in all the history of the United States, President Roosevelt, with a popular majority of approximately ten million votes, captured all but S if the electoral votes. He will receive 523 in the electoral college to Landon's 8, which the Republican candidate picked up in the states of Maine

and Vermont.

The sweep of the Democratic viccory includes huge majorities in both branches of the National Congres and will give the Democrats the Governors of 38 of the 48 States, leaving depublicans occupying only 7 Gubernatorial chairs. The Republicans are as ured of only 90 seats in the House of Representatives, while the Demoerats will have 332, There will be 1 Independent, 5 Farmer-Laborites and 7 Progressives. In the Senate there will be 75 Democrats, 17 Republicans. 2 Farmer-Laborites; 1 Progressive, and the Independent Senator Norris, who supported Roosevelt for reelection, Only 3 Republican governors were elected on Tuesday.

The election makes it practically impossible for any party other than the Democrats to control the Senate before 1943, and improbable that they

A remarkable thing about the election was the sizable majorities which were given the Democratic electors in nearly all of the states, Kansas, the President 50,000 majority, and elected a Democratic Governor to succeed Landon. California, on the west coast, went for Roosevelt by half a million self-help. Out of the 100 who joined souri by 400,000; New York by states, by equally decisive majorities; and Pennsylvania, traditionally Republican since the War Between the States, gave President Roosevelt 500,han community who had combined 000 majority and elected 25 Denice crats to Congress, out of the 34 that the State has.

Not since James Monroe received all the electoral votes except 1, in 1820, during "The Era of Goodfeeling", has a President been so nearly unanimously elected in the electoral college. Never before in all the history of the United States has one had more interesting and useful to the the Congress and the government of world ut large than the ones who the States so solidly behind him and ery and grumble about their hard his party.
