Immigration.

A meeting of the citizens in connection with the Town Council was called in the Town Hall Monday night to consider the propriety of sending a delegation to the Immigration Convention to be held at Hot Springs, N. C., on the 25th. The purpose of the convention being explained, there was a motion that three delegates be sent to extend the invitation of our town and section, and D. W. Shuler, J. N. Bohannon and J. F. Merrill were appointed and left on Tuesday. Delegates are expected to be in attendance from many of the Southern States, and much good may be expected from the meeting.

Sorry for the Orphans.

We cannot help but be sorry for the very large number of orphan boys who stand around the church doors Sunday mornings and evenings, chewing tobacco, smoking cigarettes, and slinging slang at one another as the congregation goes in and out. We are also sorry for the congregation who has to submit to this nuisance. We know these boys are orphans, for if they had fathers and mothers they would not be allowed to do this kind of thing.—Exchange.

There should be something done for these "orphans" before they grow to be criminals. There are a few of this class in Hickory. We are sorry for them.

Blowing Rock.

This place, which is now well known from the Atlantic to the Mississippi, has been built up almost between suns, comparatively speaking. A few years ago the pleasures to be had and the health to be enjoyed at this delightful summer resort were, known only to a few that lived in the adjoining counties, now this enchanting spot is covered with private summer residences and hotels, the largest of which is the Blowing Rock Hotel, run by Mr. George Finley and others, which opens the first of June.

Blowing Rock is about 4,000 feet above the sea level, and the average temperature during the summer season is about 75°.

There has never been any contagious disease of any kind known in the country, and one is so braces and invigorated by the atmosphere that he feels as though he had bathed in the mythical spring of youth and was young again.

It is a place for the old as well as the young, the happy and the unhappy, the quiet and the boisterous; there is room for all, and amusement for those that seek it and solitude for those that enjoy their own company better than the company of others.

To those who admire and delight in the study of the beauties of nature, Blowing Rock is particularly suited. The mountain scenery is beautiful and grand beyond description.

Items from Eastern Burke.

The winter has gone, the spring has come, and the voice of the turtle dove is heard in our land. The wheat looks green and promising. If no more frost comes the peach, apple, cherry and plum crop will be abundant. The poplar and apple trees are very green, while the thrush, blackbird, robin and killdeer make the forest ring with their notes. Every bird seems to be singing to its mate, and our young people have caught the inspiration of the season. Pictures, evening calls, and an abundance of bouquets, especially about the College and Connally Springs, fill up the leisure hours of the young people.

Farmers are preparing for larger crops than ever before in this part of the State. The stock law has removed the necessity of fencing, and men and women are planting in every corner and nook, and some even in the woods. If the year is seasonable, eastern Burke will advance 100 per cent this year upon everything that grows out of the ground.

Messrs. Connally and Sides are doing an excellent business with their mills. They are becoming wealthy by creating wealth. Some men get wealth by robbery. Not so with these men. They are becoming rich by making wealth.

The health of eastern Burke has no superior in the South. No one is sick in all Lovelady township, except a few chronic complaints. In fact, there has been no sickness in the township of which I have heard, during the year. This certainly is a glorious country in which to live. No better place for a sanitarium could be found in the South than at the College or Connally Springs.

The Rutherford College is prospering beyond its own expectations. The number of students is larger than it has been for years. The male students this term are more than 150 per cent greater than last term; and the female element is 82 per cent greater than last term, and "still they come." Seven new students entered this week.

Another family of Belks has moved here from Union county for educational purposes. The commencement, we learn, will be on the 22d and 23d of May. Dr. Bays will preach the annual sermon, and Dr. Robey delivers the address. On Thursday, the 23d, Dr. Bays will deliver one of his inimitable lectures in the interest of the college.

The following resolutions were read and adopted:

By J. G. Hall.

The Democratic Party of Catawba county in Convention assembled do resolve:

1st. That in Grover Cleveland, President of the United States, we find an eminently wise and patriotic ruler, who is at one and the same time, the exponent of the people's rights, and the avenger of their wrongs. To the face of the calm "courage of his convictions," political jealousy, and partisan ambition and spoliation, have vanished like the mists of the morning before the sun of day, though his wise and dispassionate rule over "common country" is being converted into a "common union" with a disenthralled and purified democracy at the helm.

2nd. That in respect to the great issues involved in the matter of Federal taxation, we毫不犹豫地 pronounce the present tariff system, as vicious in the extreme, taking from us that, which being locked into the Treasury of the United States, tends to impoverish the masses, to nurture monopoly, and corrupt the Government. We demand at the hands of Federal legislation, an equitable and logical revision and amendment of our present tariff laws, to the end that the masses may be protected in the fruits of their respective industries, instead of paying tribute to the few who repose in wealth and oppress the many.

3rd. We demand further, that the only source of Federal Revenue be that of an equitable tariff and that such tariff be for revenue only, with such incidental protection as may flow therefrom.

4th. That in respect to the other oppressive source of Federal taxation the "Internal Revenue," we desire to give forth no uncertain sound, and to demand at the hands of our National legislators—that the Internal Revenue laws be swept from our Statute books, being useless and unnecessary, besides oppressive and corrupting in their operations, and altogether inconsistent with the liberties of a free people.

The copy of the proceedings arrived too late for publication in full, and the remainder will be given next week.
