That Board Will Rescind Action

By CHARLOTTE S. PERKINSON It is to be regretted that the board of county commissioners in session Monday voted after considerable discussion to discontinue the services of a county nurse for Warren. It seems especially to be regretted that this action came after the action of the State legislature had made it possible for the State to supplement founds appropriated by the counties to make up for the amounts cut off by the discontinuance of a federal appropriation under the Shepard-Towner act.

Those present at the meeting of the Board feel that probably the determining factor in the Board's action was a remark made by Dr. C. N. Sisk of the State Board of Health in charge of county health work. Dr. Sisk made the remarks that infancy and maternity work in the State had proved a failure.

What he probably meant was that a broader program of public health work, which included school work and supervision of contagious diseases, added to infancy and maternity work had proven a more satisfactory program in the State as a whole, and that now the work of the nurse did not have to be limited as it was when participating in the appropriation of the the effect which some of our com-

That such is not the case is a well known fact among our physicians, our midwives, and the larger proportion of our women. As I have said before it is a situation here in which the word of the docshould be given first consideration instead of the opinion of certain the case know.

county of the State has the in- ed girl and a colored man. fancy and maternity program been so well developed and so well received. While it may be a very good idea now to increase the scope of the work, to say that saving the lives of mothers and babies and supervising the work of midwives, who as a matter of fact should not be allowed to practice at all, is not the most important phase of public interested. health nursing is a mistake. One must begin at the source of life to save it, that is so much depends in after life on what sort of a grade Held For Sam Pinnell a baby is able to make in its first year of existence, whether or not he is even allowed to survive.

It is to be hoped that our county commissioners may see fit to reconsider their action and that Dr. feel that it is up to the State to port a nurse entirely, since it seems factor in causing us to lose what for so many years we have struggled to keep, not for any other purpose

Dies Home of Niece
