SUNDAY SCHOOL LESSON

by Charles E. Dunn

Lesson for March 18th. Matt. Golden Text: Matt. 7:7. Jesus Responds to Faith. 15:53-16:12.

It is a striking fact that the greatest life ever lived concentrated its energies upon a tiny area. Palestine does not comprise much more than 9,000 square miles, which makes it about the size of our state of Vermont. Now Jesus stepped outside this small region only once, in the incident of our lesson. Except for this single interruption, He lived entirely within the borders of the Holy Land, carrying on a varied ministry in Galilee and Judea, with brief excursions into Samaria and Peraea. Within this circumscribed district the Master lived the most complete and perfect life of which history has any record. As our lesson text points out, he conceived His mission in definitely Jewish terms. "I have only been sent to the lost sheep of the house of Israel." (Chap. 15:34.)

One is reminded of the great German philosopher, Immanuel Kant, who, although much interested in geography, was never more than a few miles distant from his native city Kinigsberg, in Prussia, and never saw the sea, which could be reached by a walk of two hours. In that relatively unimportant provincial capital he spent a long,

full life, rich in friendship, and profound in thought.

A more familiar example is our own Henry David Thoreau, who could never be persuaded to leave his native Concord, then a village of some 2,000 folk only.

If people would be content to stay where they are, and live simply, making the most of what is immediately at hand, life would be much more serene and wholesome.

Jesus, however, did once cross the border of Palestine into the Gentile territory of Syria, seeking retirement and recreation. But His fame had preceded Him, and at once He was sought out by a Canaanitish woman of the district who persistently demanded that her sick daughter be relieved. So impressed was the Master by her ardent faith that He granted her request.

In Memoriam

ALBERT LEE POPE

Albert Lee Pope, in his seventy-first year, died at his home between Churchill and Vaughan on Wednesday night, March 8th., after a lingering illness of nearly two years' duration.

He was laid to rest in the cemetery of Gardner's Baptist Church on Friday afternoon. The number of friends and relatives who attended the funeral services attested to the high esteem in which the deceased and his family are held. The masons of the county, assisted by some from other places, directed the funeral services. E. G. Willis, pastor of the deceased, and E. C. Shore, a former pastor, offered

words of comfort and sympathy to the bereaved family. At the grave Walter Vaughan, a mason of Henderson and a special friend of the deceased, eulogized him as a mason and a friend.

The brothers of Mr. Pope, Ash Joe, and Jim, of Scotland Neck, and Gilbert of Red Oak, together with the two brothers of Mrs. Pope, T. B. Fleming and R. D. Fleming, acted as pallbearers.

Mr. Pope had resided in Warrenton county most of his life, coming here in early manhood. He is survived by his widow, who was formerly Kate Fleming, daughter of the late Thomas Fleming of Warrenton county, one daughter, Clara Fleming Pope, who is a member of the Mason school faculty, and by three sons, T. A. Pope, Herbert Pope, and C. P. Pope.

ORANGE TOBACCO WINS AGAIN in competitive tests!

Only Public Tests of Fertilizers Ever Put On by a Manufacturer Again Prove that Orange Will Outgrow, Outqualify, Outproduce and Outdo Any Other Tobacco Goods Known

Once again Orange Tobacco Fertilizer has demonstrated the truth of our claims for it—that it will consistently outgrow, outproduce, outqualify and outdo in every way any other tobacco fertilizer known to tobacco growers anywhere. The series of tests of tobacco fertilizers just completed by highly reputable farmers proves it. But there is further proof. The tests made in 1932 proved it. The small number of claims on the Orange guarantee proved it—the experience of thousands and thousands of growers proves it also.

The guarantee of the refund of the premium on Orange is withdrawn by us this year in compliance with the N.R.A. Fertilizer Code—otherwise, we would continue it.

But regardless of that, Orange will be the best and most profitable tobacco fertilizer for you to use. It will produce more leaf and better leaf. It will bring you a better return per acre than any other goods you can use.

The tests shown herewith are the only ones ever made by a fertilizer company on which the results have been made public. To our knowledge, S-D is the only fertilizer manufacturer who, year in and year out, continues to spend its own money on tests—so that its grower friends can see the facts behind the claims made for S-D goods.

The average of the 1933 tests showed that Orange produced \$51.71 per acre more! That it was worth an average of over \$100 per ton more!

And this year, it will be even more important than ever before to use Orange. With crop reduction and bounty, you need to get not only more dollars per acre, but the more dollars you produce per acre, the more dollars you get from Uncle Sam.

Orange costs only a few dollars more per ton. This slight extra cost can be brought back to you many, many times. Use Orange!

Jamaica is our regular grade tobacco fertilizer, which we recommend highly to those who do not wish to pay the premium charged for Orange. Jamaica has been known consistently to outproduce not only other standard goods, but other premium goods. That is why we say "Jamaica is better than anybody else's best." This quality that is in Orange and Jamaica runs right through the entire S-D line. Whether for tobacco, cotton, corn, peanuts or grain, S-D goods are the best fertilizer any grower can use.

HOW THESE TESTS WERE MADE

In making these tests, the growers were asked to make their own selections of the fertilizers against which they would test ORANGE. S-D did not know against which brands ORANGE was to be tested, and had nothing whatever to do with the selection of the competitive goods. Every precaution was maintained that these tests should be absolutely fair and impartial.

The following certificate accompanied each test and was signed by each of the growers' above named:

"I hereby certify that the information given is a true and correct statement of the outcome of the test plots of tobacco grown by me. I further certify that the plots were of the same size and of the same nature of soil, and the same quantity of fertilizer and same analysis was used per acre, and that the plants were set on these plots the same day and received the same treatment of cultivation, curing and handling. I further certify that the tobacco from each plot was kept separate and apart from each other, and was sold separately on the same warehouse floor on the same day."
