We have always associated holly with Christmas. The bright shiny leaves contrasting with the red berries lend color, warmth and meaning.

Perhaps it is not generally known that all sorts of supernatural powers were once attributed to holly. This shiny plant was thought to have power to repel lightning. The eastern Indians believed that holly trees planted near the cabin would act as protectors and ward off evil spirits. Since the leaves of the holly do not readily fall off they also looked up to the plant as an emblem of courage.

Early Christians believed that holly was used to make the crown of thorns for the crucifixion. The plant was then called "righteous branch" or "thorn of Christ," for the red berries supposedly symbolized the drops of blood on Christ's brow.

The legend has it in Britain that when Christ was bearing His cross, a small

bird attempted to relieve His suffering by plucking thorns from His brow. The bird's breast became stained with blood and was known ever after as Robin Redbreast.

To this day in England and Germany, it is considered unlucky to step on a holly berry, a favorite food of the robin, in recognition of the bird's charitable act.

Many superstitions existed about bringing in the holly before Christmas. In Wales, if it was brought in before Christmas Eve, it was sure to cause family quarrels throughout the year. The type of holly brought into the household determined who was to dominate during the year. If the holly was smooth, the wife was in command; if prickly, the husband governed.

Infusions, decoctions and fomentations of holly were used for a wide assortment of human disorders. In England, a tea of holly bark was a cure for a cough. In France,

a decoction of leaves and holly leaves was believed to be a cure for measles by quinine in the treatment of intermittent fever. A tea of North American Indians pacified the squaws of Cherokees and curbed their urge for wandering. MILK is 87 per cent water.
